Data Abstraction And Problem Solving With C Walls And Mirrors 3rd Edition:

Data Abstraction and Problem Solving with C++ Frank M. Carrano, 1995 This work provides novice and professional programmers with a bridge from traditional programming methods to the object oriented techniques available in C It clearly explains encapsulation and C classes which are then used throughout to implement abstract data types such as lists stacks queues trees and tables Inheritance polymorphism templates and operator overloading are explained both conceptually and through examples The work offers early extensive coverage of recursion and uses the technique through many examples and exercises It sets out to provide a firm foundation in data abstraction emphasizing the distinction between specification and implementation

Data Abstraction and Problem Solving with C++ Frank M. Carrano, Paul Helman, Robert Veroff, 1998 Focusing on data abstraction and data structures the second edition of this very successful book continues to emphasize the needs of both the instructor and the student The book illustrates the role of classes and abstract data types ADTs in the problem solving process as the foundation for an object oriented approach Throughout the next the distinction between specification and implementation is continually stressed The text covers major applications of ADTs such as searching a flight map and performing an event driven simulation It also offers early extensive coverage of recursion and uses this technique in many examples and exercises Overall the lucid writing style widespread use of examples and flexible coverage of material have helped make this a leading book in the field Book Jacket

Data Abstraction & Problem Solving with C++ Frank M. Carrano, Timothy Henry, 2017 For courses in C Data Structures Concepts of Data Structures and Abstraction for C Programmers The 7th Edition of Data Abstraction Problem Solving with C Walls and Mirrors introduces fundamental computer science concepts related to the study of data structures The text explores problem solving and the efficient access and manipulation of data and is intended for students who already have a basic understanding of programming preferably in C The walls and mirrors mentioned in the title represent problem solving techniques that appear throughout the text Data abstraction hides the details of a module from the rest of the program whereas recursion is a repetitive technique that solves a problem by solving smaller versions of the same problems much as images in facing mirrors grow smaller with each reflection Along with general changes to improve clarity and correctness this edition features new notes programming tips examples and programming problems as well as C 11 and C 14 features including safe memory management using smart pointers and safe and secure coding techniques
