Data Visualization With D3 And Angularjs:

Data Visualization with D3 and AngularJS Christoph Körner, 2015-04-27 If you are a web developer with experience in AngularJS and want to implement interactive visualizations using D3.js this book is for you Knowledge of SVG or D3.js will give you an edge to get the most out of this book *Data Visualization with D3 and Angularjs* Christoph Korner, 2015-04-30

D3.js: Cutting-edge Data Visualization Andrew H. Rininsland, Michael Heydt, Pablo Navarro Castillo, 2017-03-31 Turn your raw data into real knowledge by creating and deploying complex data visualizations with D3.js About This Book Understand how to best represent your data by developing the right kind of visualization Explore the concepts of D3.js through examples that enable you to quickly create visualizations including charts network diagrams and maps Get practical examples of visualizations using real world data sets that show you how to use D3.js to visualize and interact with information to glean its underlying meaning Who This Book Is For Whether you are new to data and data visualization a seasoned data scientist or a computer graphics specialist this Learning Path will provide you with the skills you need to create web based and interactive data visualizations Some basic JavaScript knowledge is expected but no prior experience with data visualization or D3.js is required What You Will Learn Gain a solid understanding of the common D3.js development idioms Find out how to write basic D3.js code for servers using Node.js Install and use D3.js to create HTML elements within a document Create and style graphical elements such as circles ellipses rectangles lines paths and text using SVG Turn your data into bar and scatter charts and add margins axes labels and legends Use D3.js generators to perform the magic of creating complex visualizations from data Add interactivity to your visualizations including tool tips sorting hover to highlight and grouping and dragging of visuals Write test and distribute a D3.js based charting package Make a real time application with Node and D3.js In Detail D3.js has emerged as one of the leading platforms to develop beautiful interactive visualizations over the web We begin the course by setting up a strong foundation then build on this foundation as we take you through the entire world of reimagining data using interactive animated visualizations created in D3.js In the first module we cover the various features of D3.js to build a wide range of visualizations We also focus on the entire process of representing data through visualizations By the end of this module you will be ready to use D3.js to transform any data into a more engaging and sophisticated visualization In the next module you will learn to master the creation of graphical elements from data Using practical examples provided you will quickly get to grips with the features of D3.js and use this learning to create your own spectacular data visualizations with D3.js Over the last leg of this course you will get acquainted with how to integrate D3.js with mapping libraries to provide reverse geocoding and interactive maps among many other advanced features of D3.js This module culminates by showing you how to create enterprise level dashboards to display real time data This Learning Path combines some of the best that Packt has to offer in one complete curated package It includes content from the following Packt products Learning D3.js Data Visualization Second Edition by Andrew H Rininsland D3.js By Example by Michael

Heydt Mastering D3 js by Pablo Navarro Castillo Style and approach This course provides a comprehensive explanation of how to leverage the power of D3 js to create powerful and creative visualizations through step by step instructions in the form of modules Each module help you skill up a level in creating meaningful visualizations [Learning Responsive Data Visualization](#) Christoph Korner,2016-03-23 Master the art of building responsive visualizations on the Web About This Book Learn the techniques for building data visualizations that work well for all screen sizes Implement responsive techniques with popular libraries to get to grips with building responsive visualizations that work in the real world Incorporate responsive workflow in your data visualization process to build visualizations that take a mobile first approach Who This Book Is For Web developers and data science professionals who want to make their visualizations work for smaller screen sizes Some basic knowledge of JavaScript and Data visualization is expected What You Will Learn Get familiar with responsive design for data visualizations Understand the main concepts of D3 js to create interactive visualizations Unleash the power of Bootstrap to create stunning and responsive visualizations for all screen resolutions Implement Touch and Mouse interactions for mobile first applications Design Transitions and Animations that impress in portrait and landscape Build a Responsive World Map using GeoJSON and D3 js In Detail Using D3 js and Responsive Design principles you will not just be able to implement visualizations that look and feel awesome across all devices and screen resolutions but you will also boost your productivity and reduce development time by making use of Bootstrap the most popular framework for developing responsive web applications This book teaches the basics of scalable vector graphics SVG D3 js and Bootstrap while focusing on Responsive Design as well as mobile first visualizations the reader will start by discovering Bootstrap and how it can be used for creating responsive applications and then implement a basic bar chart in D3 js You will learn about loading parsing and filtering data in JavaScript and then dive into creating a responsive visualization by using Media Queries responsive interactions for Mobile and Desktop devices and transitions to bring the visualization to life In the following chapters we build a fully responsive interactive map to display geographic data using GeoJSON and set up integration testing with Protractor to test the application across real devices using a mobile API gateway such as AWS Device Farm You will finish the journey by discovering the caveats of mobile first applications and learn how to master cross browser complications Style and approach As the world shifts to mobile devices for consuming data on the Web developers are faced with the unique challenge of making data visualizations work for their smaller screens The growth of responsive web design enabled developers to adopt page layouts and media for smaller screens but there is still little information available on how to adapt data visualizations for the smaller screens This book fills this important gap and shows how responsive web design principles can be extended to create visualizations that work well regardless of the screen size thereby allowing developers to build user friendly visualizations that work well on all devices In addition to covering some of the popular techniques and design patterns for building responsive visualizations the book also shows readers how to implement these techniques with the help

of some popular tools and libraries

Big Data Technologies and Applications Borko Furht, Flavio

Villanustre, 2016-09-16 The objective of this book is to introduce the basic concepts of big data computing and then to describe the total solution of big data problems using HPCC an open source computing platform The book comprises 15 chapters broken into three parts The first part Big Data Technologies includes introductions to big data concepts and techniques big data analytics and visualization and learning techniques The second part LexisNexis Risk Solution to Big Data focuses on specific technologies and techniques developed at LexisNexis to solve critical problems that use big data analytics It covers the open source High Performance Computing Cluster HPCC Systems platform and its architecture as well as parallel data languages ECL and KEL developed to effectively solve big data problems The third part Big Data Applications describes various data intensive applications solved on HPCC Systems It includes applications such as cyber security social network analytics including fraud Ebola spread modeling using big data analytics unsupervised learning and image classification The book is intended for a wide variety of people including researchers scientists programmers engineers designers developers educators and students This book can also be beneficial for business managers entrepreneurs and investors

Mastering Azure Machine Learning Christoph Körner, Kaijisse Waaijer, 2020-04-30 Master expert techniques for building automated and highly scalable end to end machine learning models and pipelines in Azure using TensorFlow Spark and Kubernetes Key Features Make sense of data on the cloud by implementing advanced analytics Train and optimize advanced deep learning models efficiently on Spark using Azure Databricks Deploy machine learning models for batch and real time scoring with Azure Kubernetes Service AKS Book Description The increase being seen in data volume today requires distributed systems powerful algorithms and scalable cloud infrastructure to compute insights and train and deploy machine learning ML models This book will help you improve your knowledge of building ML models using Azure and end to end ML pipelines on the cloud The book starts with an overview of an end to end ML project and a guide on how to choose the right Azure service for different ML tasks It then focuses on Azure Machine Learning and takes you through the process of data experimentation data preparation and feature engineering using Azure Machine Learning and Python You ll learn advanced feature extraction techniques using natural language processing NLP classical ML techniques and the secrets of both a great recommendation engine and a performant computer vision model using deep learning methods You ll also explore how to train optimize and tune models using Azure Automated Machine Learning and HyperDrive and perform distributed training on Azure Then you ll learn different deployment and monitoring techniques using Azure Kubernetes Services with Azure Machine Learning along with the basics of MLOps DevOps for ML to automate your ML process as CI CD pipeline By the end of this book you ll have mastered Azure Machine Learning and be able to confidently design build and operate scalable ML pipelines in Azure What you will learn Setup your Azure Machine Learning workspace for data experimentation and visualization Perform ETL data preparation and feature extraction using Azure best practices Implement

advanced feature extraction using NLP and word embeddings
Train gradient boosted tree ensembles recommendation engines and deep neural networks on Azure Machine Learning
Use hyperparameter tuning and Azure Automated Machine Learning to optimize your ML models
Employ distributed ML on GPU clusters using Horovod in Azure Machine Learning
Deploy operate and manage your ML models at scale
Automated your end to end ML process as CI CD pipelines for MLOps
Who this book is for This machine learning book is for data professionals data analysts data engineers data scientists or machine learning developers who want to master scalable cloud based machine learning architectures in Azure This book will help you use advanced Azure services to build intelligent machine learning applications A basic understanding of Python and working knowledge of machine learning are mandatory

Mastering Azure Machine Learning Christoph Korner, Marcel Alsdorf, 2022-05-10
Supercharge and automate your deployments to Azure Machine Learning clusters and Azure Kubernetes Service using Azure Machine Learning services
Key Features
Implement end to end machine learning pipelines on Azure
Train deep learning models using Azure compute infrastructure
Deploy machine learning models using MLOps
Book Description
Azure Machine Learning is a cloud service for accelerating and managing the machine learning ML project life cycle that ML professionals data scientists and engineers can use in their day to day workflows This book covers the end to end ML process using Microsoft Azure Machine Learning including data preparation performing and logging ML training runs designing training and deployment pipelines and managing these pipelines via MLOps The first section shows you how to set up an Azure Machine Learning workspace ingest and version datasets as well as preprocess label and enrich these datasets for training In the next two sections you ll discover how to enrich and train ML models for embedding classification and regression You ll explore advanced NLP techniques traditional ML models such as boosted trees modern deep neural networks recommendation systems reinforcement learning and complex distributed ML training techniques all using Azure Machine Learning The last section will teach you how to deploy the trained models as a batch pipeline or real time scoring service using Docker Azure Machine Learning clusters Azure Kubernetes Services and alternative deployment targets By the end of this book you ll be able to combine all the steps you ve learned by building an MLOps pipeline What you will learn
Understand the end to end ML pipeline
Get to grips with the Azure Machine Learning workspace
Ingest analyze and preprocess datasets for ML using the Azure cloud
Train traditional and modern ML techniques efficiently using Azure ML
Deploy ML models for batch and real time scoring
Understand model interoperability with ONNX
Deploy ML models to FPGAs and Azure IoT Edge
Build an automated MLOps pipeline using Azure DevOps
Who this book is for This book is for machine learning engineers data scientists and machine learning developers who want to use the Microsoft Azure cloud to manage their datasets and machine learning experiments and build an enterprise grade ML architecture using MLOps This book will also help anyone interested in machine learning to explore important steps of the ML process and use Azure Machine Learning to support them along with building powerful ML cloud applications A basic understanding of Python and

knowledge of machine learning are recommended *JavaScript and jQuery for Data Analysis and Visualization* Jon Raasch, Graham Murray, Vadim Ogievetsky, Joseph Lowery, 2014-11-14 Go beyond design concepts build dynamic data visualizations using JavaScript JavaScript and jQuery for Data Analysis and Visualization goes beyond design concepts to show readers how to build dynamic best of breed visualizations using JavaScript the most popular language for web programming The authors show data analysts developers and web designers how they can put the power and flexibility of modern JavaScript libraries to work to analyze data and then present it using best of breed visualizations They also demonstrate the use of each technique with real world use cases showing how to apply the appropriate JavaScript and jQuery libraries to achieve the desired visualization All of the key techniques and tools are explained in this full color step by step guide The companion website includes all sample codes used to generate the visualizations in the book data sets and links to the libraries and other resources covered Go beyond basic design concepts and get a firm grasp of visualization approaches and techniques using JavaScript and jQuery Discover detailed step by step directions for building specific types of data visualizations in this full color guide Learn more about the core JavaScript and jQuery libraries that enable analysis and visualization Find compelling stories in complex data and create amazing visualizations cost effectively Let JavaScript and jQuery for Data Analysis and Visualization be the resource that guides you through the myriad strategies and solutions for combining analysis and visualization with stunning results **Pro Hadoop Data Analytics** Kerry Koitzsch, 2016-12-29 Learn advanced analytical techniques and leverage existing tool kits to make your analytic applications more powerful precise and efficient This book provides the right combination of architecture design and implementation information to create analytical systems that go beyond the basics of classification clustering and recommendation Pro Hadoop Data Analytics emphasizes best practices to ensure coherent efficient development A complete example system will be developed using standard third party components that consist of the tool kits libraries visualization and reporting code as well as support glue to provide a working and extensible end to end system The book also highlights the importance of end to end flexible configurable high performance data pipeline systems with analytical components as well as appropriate visualization results You ll discover the importance of mix and match or hybrid systems using different analytical components in one application This hybrid approach will be prominent in the examples What You ll Learn Build big data analytic systems with the Hadoop ecosystem Use libraries tool kits and algorithms to make development easier and more effective Apply metrics to measure performance and efficiency of components and systems Connect to standard relational databases noSQL data sources and more Follow case studies with example components to create your own systems Who This Book Is For Software engineers architects and data scientists with an interest in the design and implementation of big data analytical systems using Hadoop the Hadoop ecosystem and other associated technologies **Innovation Through Information Systems** Frederik Ahlemann, Reinhard Schütte, Stefan Stieglitz, 2021-10-15 This book presents the current state of research in

information systems and digital transformation Due to the global trend of digitalization and the impact of the Covid 19 pandemic the need for innovative high quality research on information systems is higher than ever In this context the book covers a wide range of topics such as digital innovation business analytics artificial intelligence and IT strategy which affect companies individuals and societies This volume gathers the revised and peer reviewed papers on the topic Technology presented at the International Conference on Information Systems held at the University of Duisburg Essen in 2021

Data Visualization With D3 And Angularjs Book Review: Unveiling the Magic of Language

In an electronic digital era where connections and knowledge reign supreme, the enchanting power of language has become more apparent than ever. Its ability to stir emotions, provoke thought, and instigate transformation is actually remarkable. This extraordinary book, aptly titled "**Data Visualization With D3 And Angularjs**," written by a very acclaimed author, immerses readers in a captivating exploration of the significance of language and its profound effect on our existence. Throughout this critique, we will delve into the book's central themes, evaluate its unique writing style, and assess its overall influence on its readership.
