Das Lorscher Arzneibuch Gundolf Keil, 1989 **Science Translated** Michèle Goyens, Pieter de Leemans, An Smets, 2008 *Mediaevalia Lovaniensia* 40 Medieval translators played an important role in the development and evolution of a scientific lexicon At a time when most scholars deferred to authority the translations of canonical texts assumed great importance Moreover translation occurred at two levels in the Middle Ages First Greek or Arabic texts were translated into the learned language Latin Second Latin texts became source texts themselves to be translated into the vernaculars as their importance across Europe started to increase The situation of the respective translators at these two levels was

fundamentally different whereas the former could rely on a long tradition of scientific discourse the latter had the enormous responsibility of actually developing a scientific vocabulary The contributions in the present volume investigate both levels greatly illuminating the emergence of the scientific terminology and concepts that became so fundamental in early modern intellectual discourse The scientific disciplines covered in the book include among others medicine biology astronomy and physics
