Data und Goliath - Die Schlacht um die Kontrolle unserer Welt Bruce Schneier, 2015-10-12 Wenn man online ist sein Smartphone einschaltet oder mit der Kreditkarte bezahlt Auf Schritt und Tritt gewollt und ungewollt hinterlässt man automatisch seinen digitalen Fingerabdruck Das ist inzwischen zumindest bekannt nicht zuletzt durch die Enthüllungen von Edward Snowden Weniger bekannt und bewusst ist in welchem nahezu unglaublichen Umfang diese Daten und Informationen global gespeichert ausgewertet und von Regierungen und Unternehmen gesammelt oder gar bzw verkauft werden Je mehr Daten desto mehr Macht so definiert sich heute Weltherrschaft Der international bekannteste Sicherheitsexperte Bruce Schneier enthüllt das volle Ausmaß dieser Datenschiebereien Er reklamiert fehlende Kontrollmechanismen und prangert den globalen Missbrauch der Daten für Zensur und Propagandazwecke und die zunehmende Cyberkriminalität Tritt und Tor geöffnet wird Jedes Online Konto Smartphone aber auch Auto ist ein Daten Lieferant und wir die möglichen Opfer Diese Gefahr sollte man nicht auf die leichte Schulter nehmen Bruce Schneier zeigt was man dagegen tun kann und sollte und warum man sein Smartphone durchaus fürchten sollte The Discourse of Biorights José-Antonio Seoane, Oscar Vergara, 2024-09-30 This book provides answers to the questions that biomedical and biotechnological research has posed to our societies by proposing the introduction of biorights It shows how bioscience affects our individual and social lives by discussing and answering important questions such as Are we becoming more vulnerable and unable to protect ourselves How can we ensure fairness and justice with regards to the access to health care Are human dignity autonomy and equality at risk Do we need new and special rights neurorights genetic rights What is the meaning and scope of the right to life health privacy or non discrimination Biorights are the suggested solution for dealing with these challenges Healthcare professionals bio researchers policy makers scholars and citizens will in this book find a guide to knowing how bioscience affects our lives Furthermore this book provides a comprehensive method for biomedical and biotechnological decision making that comprises human or basic rights dimensions alongside technical and ethical dimensions Chapters 1 2 and 18 are available open access under a Creative Commons Attribution 4 0 International License via link [springer.com](https://www.springer.com) **Trust and Transparency in an Age of Surveillance** Lora Anne Viola, Paweł Laidler, 2021-11-29 Investigating the theoretical and empirical relationships between transparency and trust in the context of surveillance this volume argues that neither transparency nor trust provides a simple and self evident path for mitigating the negative political and social consequences of state surveillance practices Dominant in both the scholarly literature and public debate is the conviction that transparency can promote better informed decisions provide greater oversight and restore trust damaged by the secrecy of surveillance The contributions to this volume challenge this conventional wisdom by considering how relations of trust and policies of transparency are modulated by underlying power asymmetries sociohistorical legacies economic structures and institutional constraints They study trust and transparency as embedded in specific sociopolitical

contexts to show how under certain conditions transparency can become a tool of social control that erodes trust while mistrust rather than trust can sometimes offer the most promising approach to safeguarding rights and freedom in an age of surveillance The first book addressing the interrelationship of trust transparency and surveillance practices this volume will be of interest to scholars and students of surveillance studies as well as appeal to an interdisciplinary audience given the contributions from political science sociology philosophy law and civil society The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
