- 2 Explains the principles of data link control with many examples and insights into distributed algorithms and protocols
- 3 Provides an intuitive coverage of queueing and its applications in delay and performance analysis of networks
- 4 Covers the theory of multiaccess communications and local data networks
- 5 Discusses in depth theoretical and practical aspects of routing and topological design
- 6 Covers the theory of flow control emphasizing issues of congestion and delay in integrated high speed networks

Public Data Networks Josef Puzman, Boris Kubin, 2012-12-06 Public Data Networks provide a comprehensive survey of PDNs covering all major countries PDNs allow efficient and cost effective telecommunication between a terminal and computer or between computers regardless of who owns the data terminal The authors discuss the current state of and forthcoming developments in data communications using public telecommunication facilities Apart from the classical telecommunication networks telegraph and telephone public data networks provide the majority of data communication services worldwide The range of data services and user facilities has gradually expanded the quality of services improved and new services have appeared e.g. datafax teletex videotex message handling and teleconferencing The authors concentrate on PDN principles taking account of the latest CCITT recommendations and ISO standards Appendices and references provide detailed information for those working on PDNs at research design an implementation level Network digitalization and integration of networks and services have aided progress towards the integrated services digital network ISDN The ISDN uses advanced transmission and switching techniques to enhance the telecommunication services provided to its users An ISDN has much in common with the PDN as far as architecture methods of network management and functions are concerned but there are distinct differences in the methods of access and signalling The authors have extensive experience in data communication networking Dr Kubin is vice chairman of Study Group IX of the International Telegraph and Telephone Consultative Committee CCITT Dr Puzman is the Czechoslovak representative at Technical Commission 6 TC 6 of the

International Federation for Information Processing IFIP Public Data Networks is essential reading for researchers and designers of PDNs in universities and industry and provides important reference material for telecommunications and computer science students
