Rethinking EU VAT for P2P Distribution Cristina Trenta, 2015-09-24 Peer to peer P2P networks decentralized group
structures allowing anyone to easily download and share resources online already play a critical role in the distribution of
digital content Most of the debate on P2P heretofore has focused on copyright issues However as the basis for legitimate
business models a number of companies have already quietly embraced P2P has a largely unknown and underestimated
impact on taxation with vast repercussions on the development of mature profitable markets This book analyses the current
framing for digital and media supplies provided via P2P technologies through the lens of an interdisciplinary approach
drawing on tax law computer science economics copyright law and business studies VAT concepts such as those of economic
activity and taxable person taxable transactions consideration barter and taxable amount and territoriality rules are
discussed in connection with P2P as is the evaluation of VAT liability for P2P operations in the presence of copyright
infringement Topics and issues considered include centralized and decentralized P2P networks free riding problems
identifying actors in P2P networks for VAT purposes P2P and place of supply and pros and cons of integrating P2P with
taxation regimes and especially VAT systems The analysis draws on a vast range of sources including EU legislation and case
law tax law literature and doctrine international conventions and treaties Council of Europe and OECD documents ECHR
case law and official documents and cases from key jurisdictions worldwide offering the first thoroughly grounded approach
to overcoming the lack of understanding and awareness of ongoing changes currently separating the digital economy and
traditional taxation systems and a solid platform for discussion to the diverse communities of researchers and professionals
