Vassiliou, Mir-Yusif Mir-Babayev, 2022-10-25 The nineteenth century was an exciting and dynamic era of rapid progress in industry and technology One of the most vigorous of the new industries was petroleum It first transformed the way people lit their houses displacing whale oil and other substitutes and then revolutionized the entire field of energy and helped create the modern world During the nineteenth century oil was overwhelmingly dominated by the United States and the Russian Empire together responsible for 97% of the world's production and over the course of the century nearly all the Russian Empire's oil came from the territory that is now the independent state of Azerbaijan Many people don't know that the world's first industrial oil well was drilled in Azerbaijan in 1846 thirteen years before Drake's celebrated well in Pennsylvania This book covers oil in the United States and Azerbaijan in all its dynamism from its earliest beginnings to the turn of the twentieth century It treats both business and technology from the early wildcatters to Standard Oil and the Nobel Brothers yes that remarkable family created more than a famous prize The book echoes into the present day for good or ill oil still moves the world

Powering Empire On Barak, 2020-03-24 The Age of Empire was driven by coal and the Middle East as an idea was made by coal Coal's imperial infrastructure presaged the geopolitics of oil that wreaks carnage

today as carbonization threatens our very climate Powering Empire argues that we cannot promote worldwide decarbonization without first understanding the history of the globalization of carbon energy How did this black rock come to have such long lasting power over the world economy Focusing on the flow of British carbon energy to the Middle East On Barak excavates the historic nexus between coal and empire to reveal the political and military motives behind what is conventionally seen as a technological innovation He provocatively recounts the carbon intensive entanglements of Western and non Western powers and reveals unfamiliar resources such as Islamic risk aversion and Gandhian vegetarianism for a climate justice that relies on more diverse and ethical solutions worldwide
