Chinas Futures Prc Elites Debate Economics Politics And Foreign Policy:

China's Futures Daniel C. Lynch, 2015-03-11 China's Futures cuts through the sometimes confounding and unfounded speculation of international pundits and commentators to provide readers with an important yet overlooked set of complex views concerning China's future views originating within China itself Daniel Lynch seeks to answer the simple but rarely asked question how do China's own leaders and other elite figures assess their country's future Many Western social scientists business leaders journalists technocrats analysts and policymakers convey confident predictions about the future of China's rise Every day the business political and even entertainment news is filled with stories and commentary not only on what is happening in China now but also what Western experts confidently think will happen in the future Typically missing from these accounts is how people of power and influence in China itself imagine their country's developmental course Yet the assessments of elites in a still super authoritarian country like China should make a critical difference in what the national trajectory eventually becomes In China's Futures Lynch traces the varying possible national trajectories based on how China's own specialists are evaluating their country's current course and his book is the first to assess the strengths and weaknesses of predictioneering in Western social science as applied to China It does so by examining Chinese debates in five critical issue areas concerning China's trajectory the economy domestic political processes and institutions communication and the Internet arrival of the network society foreign policy strategy and international soft power cultural competition

Chinese Politics and Foreign Policy under Xi Jinping Arthur S. Ding, Jagannath P. Panda, 2020-11-23 This book focuses on China's future under Xi Jinping's authoritarian leadership by examining various facets of the political economic social and foreign policy trajectories of contemporary China It assesses Xi Jinping's power dynamic as the core leader of the Communist Party of China CPC and analyses the impact of Xi's signature domestic policies which demonstrate his political authority within the domestic sphere Moreover the book presents Xi's pro active assertive and action oriented outlook as a foundation for China's diplomacy in the new era Bringing together an international set of experts in the field who explore critical facets of China under Xi Jinping that deeply influence the regional as well as the global order the book investigates the impact of Chinese initiatives such as the grand Belt and Road Initiative BRI the Asian Infrastructure Investment Bank AIIB and the BRICS New Development Bank NDB Importantly the book illustrates US China relations and outlines how this relationship will intensify in the post COVID 19 era which is poised to be one of the biggest challenges and turning points of the Asian Century Offering a timely insight into China's future and the trajectory of Xi Jinping's consolidation of power this book will be of interest to academics in the fields of China Studies Asian and International Politics and International Relations **China Debates Its Global Role** Shaun Breslin, Ren Xiao, 2021-09-30 What do China's scholars make of the nature of China's global rise And what is the significance of academic debates for Chinese policy goals and preferences In this book leading Chinese specialists outline how their colleagues are studying and interpreting different dimensions of China's evolving global role

opening these Chinese language debates to a new audience Collectively they show that while some ideas and ways of thinking are more prominent than others there is no homogeneity of scholarship and no single conception of what China thinks and wants Not only has the range of issue areas under discussion actually increased as China's global role and impact has changed but there also remains considerable diversity when it comes to thinking on what China can might and should try to do as a global power and how China's global role should be studied and theorized The chapters in this book were originally published in the journal *The Pacific Review* **Chinese Scholars and Foreign Policy** Huiyun Feng,Kai He,Yan

Xuetong,2019-01-04 How does China see the rest of the world One way to answer this question is to look at the work of China's scholars in the field of International Relations IR This leads to a second question to what extent do Chinese IR scholars influence Beijing's foreign policy and outlook The contributors to this book seek to answer these key questions drawing on their own first and second hand experiences of involvement in scholarly IR debates in China Discussing fundamental aspects of China's foreign policy such as China's view of the international structure soft power projection maritime disputes and the principle of non interference this book provides insights into the hinterland of Chinese foreign policy making It is an invaluable reference for global IR scholars especially those with a direct interest in understanding and predicting China's actions and reactions on a range of international issues China's Political Worldview and Chinese

Exceptionalism Benjamin Ho,2025-10-01 China's Political Worldview and Chinese Exceptionalism International Order and Global Leadership uses the notion of Chinese exceptionalism as a framework to analyze China's international politics and foreign policy This book argues that China's approach to international relations is best understood in the context of these claims to exceptionalism and China's broader political world view In doing so it fosters a more comprehensive understanding of China's actions within the realms of foreign policy and international politics and in the context of the preferred world order norms and rules that the country seeks to promote Focuses on the study of China's political worldview an area that is under studied by Western scholars of Chinese politics Emphasizes on China's diplomatic activities in Asia which is an area of great interest to policy makers Study on Chinese exceptionalism which is also an under researched albeit growing theme in recent years **The European Union and China's Belt and Road** Vassilis Ntousas,Stephen Minas,2021-08-10 This book

explores key elements of European Union EU engagement with the Belt Road Initiative BRI drawing on the expertise of leading practitioners and scholars of EU China relations Under the theme of discerning the BRI and its nexus with the EU chapters examine the nature of the BRI as China's approach to global governance and consider how BRI intersects with the EU as a very different regional integration project Under the theme of BRI factors in EU law and policy chapters examine the BRI as a factor in specific domains of EU law and policy including investment finance the environment and the COVID 19 pandemic and consider EU responses Under the theme of EU Member State experiences chapters present a series of case studies of individual Member States their engagement with the BRI and ongoing policy debates This book will be of interest

to scholars and students of International Relations EU external relations Chinese public policy and foreign relations European studies and security studies as well as policymakers dealing with China in EU and Member State institutions

An East Asian Challenge to Western Neoliberalism Niv Horesh, Kean Fan Lim, 2017-08-03 Analysts generally agree that in the long term the biggest challenge to American hegemony is not military but rather China's economic rise. This perception is spread in no small measure because Xi Jinping has in the face of patent military inferiority conducted himself much more boldly on the world stage than Hu Jintao. Meanwhile China has also begun conjuring up an alternative vision for global leadership now widely termed as the China model. This book therefore offers a critical and comprehensive explanation of the China model and its origins. Using a range of case studies covering varying historical and geographical approaches it debates whether the Chinese experience in the last three decades of economic reform should be interpreted as an answer to the reigning hegemony of neoliberalism or rather a further reinforcement of it. To answer these questions it provides an investigation into what China may have learned from its East Asian neighbours earlier economic successes. It also examines how it is responding to and might even reconfigure the world political economic system as it develops fresh and potentially more powerful regulatory capacities. Providing a multi-dimensional analysis of the China model the book will be of interest to students and scholars of Chinese Economics Economic Geography and Chinese Studies. *Clash of Powers* Kristen

Hopewell, 2020-10-22 The US-China trade war instigated by President Trump has thrown the multilateral trading system into a crisis. Drawing on vast interview and documentary materials Hopewell shows how US-China conflict had already paralyzed the system of international rules and institutions governing trade. The China Paradox the fact that China is both a developing country and an economic powerhouse creates significant challenges for global trade governance and rule making. While China demands exemptions from global trade disciplines as a developing country the US refuses to extend special treatment to its rival. The implications of this conflict extend far beyond trade impeding pro-development and pro-environment reforms of the global trading system. As one of the first analyses of the implications of US-China rivalry for the governance of global trade this book is crucial to our understanding of China's impact on the global trading system and on the liberal international economic order. *Rethinking Participation in Global Governance* Joost Pauwelyn, Martino Maggetti, Tim Büthe, Ayelet

Berman, 2022-05-05 International organizations and other global governance bodies often make rules and decisions without input from many of the individuals groups firms and governments that are affected by them. The standards of the Basel Committee on Banking Supervision for instance developed by a small number of states govern financial markets and the safety of bank deposits in over a hundred jurisdictions. Historically the interests of developing countries as well as non-commercial and diffuse interests within countries have been excluded or disregarded in global governance. Scholars and practitioners have criticised this democratic deficit and called for greater participation of such marginalized stakeholders. Against this background international institutions have introduced a variety of reforms with the goal of increasing and

facilitating the participation of these excluded stakeholders This book brings together an expert group of scholars and practitioners to investigate the consequences of stakeholder participation reforms in the global governance of health and finance What reforms have been introduced Have these reforms given previously marginalized stakeholders a voice in global governance bodies What effect have these reforms had on the legitimacy and effectiveness of global governance To answer these questions the book examines treaty based intergovernmental organizations alongside newer forms of global governance such as trans governmental regulatory networks multi stakeholder partnerships and private standard setting bodies Through a series of paired comparative analyses the book provides insights into the experiences of large emerging and smaller or lower income developing countries Brazil v Argentina China v Vietnam India v the Philippines in a diverse set of organizations including the World Bank and the World Health Organization the Basel Committee on Banking Supervision the Global Fund to Fight AIDS Tuberculosis and Malaria the International Accounting Standards Board Codex Alimentarius Commission and more

Iran and China Shirzad Azad, 2017-02-09 Because of their historical roles and politico economic significance in contemporary international politics Iran and China have perpetually been in the crosshairs of both policy circles and interested observers in almost every other part of the world Crucial interactions touching upon any aspect of Tehran Beijing ties from diplomatic and military links to economic and cultural connections have especially been in the limelight of such riveting inquisitiveness which has often given rise to a flurry of rash comments sensational claims and impetuous conclusions But a detached probe into critical developments involving Iran and China however elucidates this rather inconvenient eventuality that the relations between the two important countries are not essentially based on pivotal principles and clear cut commitments nor do their ties really rest on tenuous thoughts and flimsy foundations devoid of any common interests in short term or well conceived objectives in long run In the same way the two political systems in Tehran and Beijing may ultimately end up each contributing to a separate pole of power regionally and internationally rather than moving faithfully and steadfastly in lockstep with what it requires them to truly materialize their more recent aspiration and design to move toward achieving a very close strategic partnership
