## De Overlevering Van Den Bijbeltekst:

DE WETENSCHAPPELIJKE MORALITEIT VAN DR AVAN DER LINDE EEN POOSJE MAAR TE LUCHT EN GEHANGEN  
MEIJER ROEST,1870 *Conjecturaal kritiek toegepast op den tekst van de Schriften des Nieuwen Testaments* Willem  
Christiaan Manen,1880 Handboek der historisch-kritische inleiding in de kanonieke Schriften van het Oude Testament  
Carl Friedrich Keil,1857 *Handboek der historisch-kritische inleiding in de kanonieke en apokryfe boeken des Ouden*  
*Testaments* Carl Friedrich Keil,1857 Christelijke Huisbijbel. De tekst der gewone of Statenoverzetting, geordend en  
ingerigt voor de huiselijke Bijbellesing en het Godsdienstig onderwijs, door C. E. van Koetsveld. [With introductions to the  
Bible and its various divisions by the editor.],1861 *Algemeene geschiedenis der wereld* Mozes Salomon Polak,1841

*Hebreeuwsche spraakkunst, met opstellen ter oefening en een Ned. Hebr. woordenlijst* Maarten Noordtjij,1895 **De**  
**tijdspeigel**,1858 **Perpetual Motion** Percy Verance,1903-01-01 Perpetual Motion as used in this book is to be taken in  
its conventional and not in its strict literal sense The strict literal analysis of the two words implies unceasing motion Of this  
we have many illustrations the tides the waves of the ocean the course of the earth around the sun and in the movements of  
all heavenly and astronomical bodies In fact it is difficult to conceive in a strictly scientific sense of any substance having an  
entire absence of motion Perpetual Motion as used in this book means what it is usually understood to mean Self Motive  
Power a machine that furnishes the power to keep its parts going as a machine In this sense Perpetual Motion has always  
engaged the minds of many many people and what is more natural As soon as a boy begins to take an interest in moving  
parts of machinery vehicles locomotives and what not he perceives that the application of power results in the motion of  
bodies and again that bodies in motion are productive of power A wheel moved by muscular or other mechanical power is  
made by machinery to elevate water and elevated water can be made in descending to run machinery The windlass or other  
wheel turned by applied force lifts buckets from wells raises stone and elevates heavy bodies if desired Heavy bodies  
descending can be and are used through means of machinery to make machinery run A great many similar illustrations could  
be given What then is more natural than that a boy with an active mind who is at all mechanically turned as most boys are  
begins to wonder why if wheels lift stones and if stones descending make wheels run cannot a machine be made that will lift  
stones or other weights and in turn be run by the descent of the lifted stones or other weights Why if the turning of wheels  
lift water and if descending water makes wheels go should not an adaptation be made by which the same machine will  
elevate water and be run by the descent of the elevated water That it cannot be done is now the consensus of opinion of all  
technically trained mechanics but that it can not be done and why it can not be done is sure not to occur to the boy nor to the  
man who has only a strong natural mechanical sense to guide him and has not the advantage of technical training Again it is  
well known that many many men have spent considerable sums of money and given hours and hours and days and months  
and years of close and careful thought and experiment to the production of a machine that will accomplish Perpetual Motion

and that many have announced to the world that they had succeeded in its accomplishment but that all their devices so far have turned out failures It is to no purpose to tell the Perpetual Motion worker that he is seeking to attain the impossible that the attainment of self motive power has been demonstrated to be an impossibility He will answer or at least he will reason to himself that many things once pronounced impossibilities and claimed to be so demonstrated have since been attained The Perpetual Motion worker is usually a person of active intelligence and being enamoured of mechanical projects is likely to read extensively along mechanical lines and knows as every well informed person knows that there are many instances in the history of the discovery and development of the most important mechanical inventions and scientific discoveries where the persistent efforts of so called enthusiastic dreamers and cranks finally triumphed over the settled and conventional impossibilities of dignified scientists      **Het Belfort** ,1899
