De Psychologie Van Het Socialisme:

Psychologie van het socialisme Hendrik de Man, Leo Magits, 1974 De psychologie van het socialisme Hendrik De Man, 2020 **Women and Socialism - Socialism and Women** Helmut Gruber, Pamela Graves, contributors, 1999-03-01

Until recently histories of women tended to be segregated from the larger historical context This pioneering volume places the role of women within the history of the interwar years when both the women's and socialist movements became prominent and raises the key question of how power was distributed between the genders in a historical setting The emblematic title of this volume highlights the fundamental conception of this comparative study of eleven West European countries that in the interwar decades two great movements gained in strength converged diverged competed and cooperated Each of these movements is viewed as a complex matrix of organized and unorganized participants However by far the most provocative questions deal with gender relations Central to these are definitions of femininity and masculinity in terms of mechanisms of inclusion and exclusion at the workplace in the home and in the political arena The mystique of the new woman in the 1920s and the 1930s challenged traditional notions of gender identity and relations not the least of which was the redefinition of the role of men The main issue addressed in this volume is not how male socialists dealt with the woman question or how women functioned in or outside left wing parties it rather centers on illustrating the power distribution between the sexes in specific political and cultural contexts This rigorously focused and coherent volume to which some of the best known scholars in the field have contributed will no doubt establish itself as the standard reference work for years to come , *Om de vernieuwing van het socialisme* H. F. Cohen, 1974 De Psychologie van het socialisme Hendrik de Man, E. J. Brouwer, 1927 **Totalitarian Democracy and After** Yehoshua Arieli, Nathan Rotenstreich, 2002 This volume first published in 1984 contains the principal papers from a distinguished colloquium held in 1982 Its avowed purpose is to investigate further the notion of totalitarian democracy and to look at its repercussions in the contemporary world **Architectures of Bureaucracy** Jens van de Maele, 2025-01-27 This monograph examines the interrelationship between politics and modernist architecture in interwar Belgium focusing on political architectural and administrative elites as propagators of new ideas of governance While Belgium was strongly influenced by neighbouring France and Germany it also developed its own avant garde approaches to socio political problems In the second half of the 1930s the country was the scene of a remarkable political and architectural experiment involving an ambitious plan for the large scale construction of modernist government office buildings These buildings were seen as essential to the development of a technocratic model of governance aimed at strengthening the role of the executive and minimising the influence of parliament More specifically the efficient new office architecture was supposed to create a new type of perfect civil servant whose loyalties would no longer lie with political parties but with scientists and management experts Such experts and scientists constituted a rising elite of *homines novi* with strong though often veiled political ambitions As such this book

contributes to our understanding of political culture in the age of extremes Religion and Politics Under Capitalism Stefan Arvidsson, 2019-04-17 This book relates some of the major trends within religion and politics to offer a historical framework with which to assess their interactions and a point of departure for studies to come The study of the interrelationship between contemporary religious practice and modern politics is divided between several scholarly disciplines all embracing different terminologies as well as multiple theoretical and philosophical premises Such diversity of perspectives is to be welcomed but it can inhibit the ability of academics to form a cohesive and coherent dialogue around the subject While critically assessing the historic sociological political theological and anthropological aspects of religion and politics the book demonstrates the crucial importance of recognising the capitalist economy as the framework for understanding their dynamic relationship Moreover it claims that humanism is the proper lens through which to critically engage with religion in society and must be the favoured point of departure for any study within the field This book offers a unique overarching viewpoint for of all these divergent scholarly trends and traditions As such it will be of significant use to academics in religious studies political science sociology and anthropology Property and Power in Social Theory Dick Pels, 2002-08-26 Property and power perform a key role in social and political theories of class inequality and social stratification however theorists have yet clearly to define these concepts their mutual boundaries and scopes of application This book answers the property power puzzle by undertaking a broad historical inquiry into its intellectual origins and present day effects through a series of case studies including Marxism vs anarchism the fascist assertion of the primacy of the political social science as power theory the managerial revolution the knowledge society and the new intellectual classes
