De Roomschkatholieke Staatspartij

Thomas T. Mackie, Richard Rose

Mackie, Richard Rose, 2016-07-27 The International Almanac is the only up to date source for the history of election results in the Western world from their origins to the present It provides clear and authoritative information for 25 different countries ranging alphabetically from Australia to the USA and geographically across four continents including Japan and new Mediterranean democracies as well as old Anglo American and Scandinavian democracies Each chapter gives a comprehensive list of all parties that have contested one or more elections its vote at each election and percentage share of the poll and the number of seats won in the national assembly The results have been checked from original sources in more than 15 languages The new edition of the Almanac brings election results up to date and incorporates fresh materials from historical research while retaining the features that have made the volume the authoritative book on elections

Catholic Power in the Netherlands Herman Bakvis, 1981 Dutch Catholics long constituted by far the most cohesive political subculture in Western Europe For nearly half a century virtually all Catholics in the Netherlands supported a single political party the Catholic party resisting appeals from both the left and the right Then in the mid 1960s their allegiance began to crumble by 1972 only a small minority of Dutch Catholics still voted for the party and a few years later it had ceased to exist

The Diversity of Nonreligion Johannes Quack, Cora Schuh, Susanne Kind, 2019-07-01 This book explores the relational dynamic of religious and nonreligious positions as well as the tensions between competing modes of nonreligion Across the globe individuals and communities are seeking to distinguish themselves in different ways from religion as they take on an identity unaffiliated to any particular faith The resulting diversity of nonreligion has until recently been largely ignored in academia Conceptually the book advances a relational approach to nonreligion which is inspired by Pierre Bourdieu's field theory It also offers further analytical distinctions that help to identify and delineate different modes of nonreligion with respect to actors values objectives and their relations with relevant religious others The significance of this conceptual frame

is illustrated by three empirical studies on organized humanism in Sweden atheism and freethought in the Philippines and secular politics in the Netherlands These studies analyze the normativities and changing positions of different groups against the background of both institutionalized religious practice and changing religious fields more generally This is a fascinating exploration of how nonreligion and secularities are developing across the world It complements existing approaches to the study of religion secularity and secularism and will therefore be of great value to scholars of religious studies as well as the anthropology history and sociology of religion more generally

A History of the Netherlands Friso Wielenga, 2019-10-03 This is the most comprehensive history of the Netherlands available in the English language It surveys Dutch history from the 16th century when the nation took shape as a geographical administrative and political entity right through to the Netherlands of today Examining domestic politics and wider international contexts as well as economic and cultural history Friso Wielenga provides a varied and in depth investigation that will lead to a rich understanding of the country's past The book also challenges misplaced preconceptions regarding political consensus and religious toleration in the country and offers a balanced assessment of developments across the early modern modern and contemporary eras This new edition includes One brand new chapter on the Netherlands since 1945 Much more material on colonial history slavery the decolonisation of Indonesia and the contemporary legacy of colonialism Historiographical updates throughout A wealth of new images maps tables and figures This book is essential reading for anyone seeking a knowledge of Dutch history since 1500

Christian Democracy in the European Union, 1945/1995 Emiel Lamberts, 1997 The authors investigate the influence of Christian Democratic parties on political institutions parliamentary democracy and European integration and socio economic structures the collective bargaining economy and the welfare state

The Netherlands and the Gold Standard, 1931-1936 Richard T. Griffiths, 1987-05-31 On 26 September 1936 deep in the night the Dutch cabinet took the decision to cut the guilder's link with gold and to devalue its currency It was the last of the increasingly isolated and beleaguered gold bloc countries to do so having outlasted Switzerland by less than a day the last country in Europe in which holders of a currency could exchange it for gold at the rate which had prevailed before the First World War the last country to leave the gold standard The reason why the Gold Bloc which in September 1936 comprised only France Switzerland and the Netherlands should have hung on so long is something of a puzzle to historians since it has become virtually axiomatic

that their recoveries would have begun sooner and proceeded more strongly had they cut the link with gold and devalued their currencies much earlier. The fact that the decision not to do so has been seen as perverse combined with the fact that in order to cope with the consequences of that decision governments chose to adopt deflationary policies to correct the economy has led historians for a long time to dismiss a whole generation of politicians and their advisors as stubborn conservative and short sighted. The Keynesian revolution and the long post war economic boom had consigned them and their ilk to the dustbin of history for ever. Common Destiny Dietrich Orlow, 2000. Although the Socialist or Social Democratic parties played a key role in West European politics during the quarter century after the Second World War they have been studied far less than their political rivals the Christian Democrats. The story of West European Social Democracy after 1945 begins with a dilemma. Democratic marxism which had been the parties ideological and organizational principle until the Second World War was becoming politically irrelevant. The three parties analyzed here represent the spectrum of reactions among Social Democratic parties to this realization. The debate over the parties programs and ideologies did not of course take place in a vacuum. The author devotes considerable space to a comparative analysis of the parties leaders and organizational structures as well as the evolution of Social Democratic domestic and foreign policies. Immensely readable this book not only offers an in depth analysis of the postwar period crucial for the history of Social Democracy but also because of its cross national treatment of these three major parties adds significantly to our understanding of the processes of European integration and the evolution of the Atlantic Alliance.
