Dead Reckoning David C. Treadway, 1996-07-04 When David Treadway was twenty his life was changed dramatically by one single shattering event his mother's suicide The child of a prominent New England hotel family Treadway watched numbly as his father and sister suffered mental breakdowns and his older brother retreated into alcoholism Though barely out of his teens David took on the role of family caretaker burying his own grief and immersing himself in helping his family cope This numbness lasted for twenty seven years Then in the midst of a busy and successful life as a husband father and therapist he realized that he was overcome by an ever growing emotional emptiness For so many years he had been running away from his feelings about his mother diverting his attention with ambitious sailing excursions and working to heal clients while ignoring his own quiet despair Though Treadway is a well known authority in the field of alcoholism and suicide his professional expertise did not help him resolve his own pain Now with this moving memoir at turns deeply heartbreaking and tender Treadway chronicles his arduous journey to finally come to terms with his mother's depression and suicide BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved *Intimacy, Change, and Other Therapeutic Mysteries* David C. The Shared Experience Of Illness Susan H. McDaniel, Jeri Hepworth, William J. Doherty, H McDaniel, 2009-08-05 In the narrative of every human life and family illness is a prominent character Even if we have avoided serious illness ourselves we cannot escape its reach into our circle of family and friends

Illness brings us closer to one another through caregiving and separates us through disability and death yet little attention has been paid to personal and family illness in psychotherapy. Rather therapists tend to focus on the psychosocial realm leaving the biological realm to other physicians and nurses. Susan H McDaniel, Jeri Hepworth and William J Doherty invited therapists who work with individuals and families experiencing chronic illness and disability to describe clinical cases that illustrate their approach to medical family therapy. Contributors then were asked to share a personal story about their experiences with illness and to explain how those experiences affect the way they work with their clients. Vivid case studies dealing with a range of illnesses including cancer, infertility, schizophrenia, AIDS, heart disease, diabetes, asthma, and multiple sclerosis show how the therapists' own experiences of illness are relevant to their care of others and how these experiences can be used to form a healing bond in therapy. Poignant, honest, and illuminating. *The Shared Experience of Illness* allows us to understand more fully the relationship between the personal and the professional. As We Grieve, Jan Groft, 2011. Having encountered unexpected moments of grace in her own grief journeys, writer Jan Groft set out to find others who have felt lifted even momentarily out of their sorrows. New Directions in Sex Therapy, Peggy J. Kleinplatz, 2012. *New Directions in Sex Therapy*, Second Edition, focuses on cutting edge therapy paradigms as alternatives to conventional clinical strategies. It expands the definition of our field and is intended for anyone who deals with sexual issues and concerns in therapy: clinicians of every kind, novices and advanced practitioners rather than only those who define themselves as sex therapists.

Reconstructing Illness, Anne Hunsaker Hawkins, 1999. Serious illness and mortality, those most universal, unavoidable, and frightening of human experiences, are the focus of this pioneering study which has been hailed as a telling and provocative commentary on our times. As modern medicine has become more scientific and dispassionate, a new literary genre has emerged: pathography, the personal narrative concerning illness, treatment, and sometimes death. Hawkins's sensitive reading of numerous pathographies highlights the assumptions, attitudes, and myths that people bring to the medical encounter. One factor emerges again and again in these case studies: the tendency in contemporary medical practice to focus primarily not on the needs of the individual who is sick but on the condition that we call disease. Pathography allows the individual person a voice, one that asserts the importance of the experiential side of illness and thus restores the feeling, thinking, experiencing human being to the center of the medical enterprise. Recommended for medical practitioners, the clergy, caregivers, students of popular culture, and the general reader. *Reconstructing Illness* demonstrates that only when we hear both the doctor's and the patient's voice will we have a medicine that is truly human.
