Urban China The World Bank; Development Research Center of the State Council, 2014-07-29 In the last 30 years China's record economic growth lifted half a billion people out of poverty with rapid urbanization providing abundant labor, cheap land and good infrastructure. While China has avoided some of the common ills of urbanization, strains are showing as inefficient land development leads to urban sprawl and ghost towns, pollution threatens people's health and farmland and water resources are becoming scarce. With China's urban population projected to rise to about one billion or close to 70 percent of the country's population by 2030, China's leaders are seeking a more coordinated urbanization process. *Urban China* is a joint research report by a team from the World Bank and the Development Research Center of China's State Council, which was established to address the challenges and opportunities of urbanization in China and to help China forge a new model of urbanization. The report takes as its point of departure the conviction that China's urbanization can become more efficient, inclusive and sustainable. However, it stresses that achieving this vision will require strong support from both government and the markets for policy reforms in a number of areas. The report proposes six main areas for reform: first, amending land management institutions to foster more efficient land use; denser cities; modernized agriculture and more equitable wealth distribution; second, adjusting the hukou household registration system to increase labor mobility and provide urban migrant workers equal access to a common standard of public services; third, placing urban finances on a more sustainable footing while fostering financial discipline among local governments; fourth, improving urban planning to enhance connectivity and encourage scale and agglomeration economies; fifth, reducing environmental pressures through more efficient resource management; and sixth, improving governance at the local level.

Future Directions in Social Development James Midgley, Manohar Pawar, 2016-11-25 This book invites readers to think about future directions in social development. The book succinctly presents the historical context and progress of social development. By reflecting on the Millennium and Sustainable Development Goals, it discusses the increasing global relevance of several critical themes and issues such as human rights and good governance, participation, peace, gender, environment, religion and spirituality, aging, social protection and partnership. It appreciates the importance of goals and targets but calls to look beyond them to visualise future directions in social development. The book argues that values-driven social development needs to focus on knowledge creation, dissemination and training, draw on multidisciplinary knowledge and professionals, promote conscientious consumption, create less unequal societies and engage in innovation that brings happiness to everyone.

Economics and Ageing José Luis Iparraguirre, 2018-12-11 This upper level textbook provides a coherent introduction to the economic implications of individual and population ageing. Placing economic considerations into a wider social sciences context, this is ideal reading not only for advanced undergraduate and masters students in economics, health economics and the economics of ageing but also policy makers, students, professionals and practitioners in gerontology, sociology, health-related sciences and social care. This volume introduces the different conceptualisations of age and
