**Colonialism and Foreign Ownership of Capital (Routledge Revivals)** Bharat Hazari, 2015-12-22 First published in 1982 Foreign control of capital is a major problem for many developing countries and can lead to the exercise of a form of colonial control whereby capital is provided for political rather than economic reasons This book discusses the implications of this phenomenon for trade theory and the amount of pressure that foreign countries can exert The opening chapter examines the themes of de industrialisation of stagnation after an initial spurt in economic activity and the premise that inflows of capital do not necessarily generate growth and expansion These initial discussions are developed in the subsequent chapters where the effects of foreign ownership on the host country's economy and trade are dealt with fully This work would be of interest to students of economics and development

*Neoliberalism Inequality and Authoritarianism* Jon Kofas,2024-09-03 This book exposes the inherent contradictions of neoliberalism The myth of limitless growth ignores the reality of resource constraints and fuels a global upward transfer of wealth Meanwhile a fractured global economy and intensifying class warfare chip away at neoliberalism s foundation As inequality spirals and social justice crumbles the model increasingly serves a privileged few at the expense of the majority This undermines the Enlightenment ideal of using liberal democracy to improve lives in the age of mass politics threatening neoliberalism s very survival

**Make / Believe** John Hartley,2025-01-23 This book illustrates that mediated popular culture and science based knowledge systems entangled and compromised as both have become are still a robust crucible for system change for the future when they combine forces Planetary crises require responses from everyone This means that collective action is not simply a scientific or political problem It is a problem of culture and media But modern politics journalism and science were not designed for global climate action They ve divided humans into competitive and often hostile we and they groups Identity news and knowledge are all weaponized Culture makes groups groups make knowledge and knowledge makes enemies What can be done to prevent global conflict and the drift to war Make Believe turns to popular culture and social media to argue for an alternative storyline While the Great Powers are making new enemies emergent classes led by children are using planetary connectivity to make new worlds A digital planet generates new kinds of strategic stories for pan human action based on difference intersectionality and cooperation for a sustainable Earth system Make Believe shows how alternatives to the Great Game of global contestation are gathering strength in unlikely places among women children lifestyle and pop culture Popular digital media literacy is now a prerequisite for the remediation of the planet
