Color Atlas Of Pulmonary Cytopathology:

Color Atlas of Pulmonary Cytopathology Sudha R. Kini, 2012-12-06 Respiratory cytopathology is indispensable in the workup of patients suspected of having lung cancer requiring cytologic evaluation and is used increasingly in immunocompromised patients for the identification of infectious diseases. Currently, there is no single text devoted exclusively to Pulmonary Cytology. Color Atlas of Pulmonary Cytopathology is the only text to include under one cover up to date information on every aspect of Respiratory Cytopathology. The atlas includes techniques of bronchoscopy, bronchoalveolar lavage and fine needle aspiration biopsy, a detailed section on cytopreparatory techniques, liberal use of images on histomorphology to complement cytology, emphasis on diagnostic pitfalls, a detailed section on cytopathology of non neoplastic conditions, unusual and uncommon lesions, cytology of metastatic lung cancers to other body sites, and a section on pediatric pulmonary cytology. Abundantly illustrated with over 1300 color images on 108 plates, the atlas presents not only the usual cytohistologic patterns of various disease entities but also focuses on differential diagnostic problems and depicts the differentiating features. Over 75 tables summarize cytologic criteria and differentiating features. A must have reference for cytotechnologists, students, cytotechnologists, pathologists, pathology residents, cytopathologists, as well as pulmonologists.

Cytopathology Sudha R. Kini, 2012-03-29 The primary thrust of this atlas is a comparison between different diagnostic entities with cytologic findings summarized in tabulated forms. The book contains over 3 200 full color photographs that illustrate the criteria for the cytology described. The Color Atlas of Differential Diagnosis in Exfoliative and Aspiration Cytopathology is an excellent reference for everyday use when difficult and challenging cases face both cytotechnologists and pathologists. A tabulated form of information saves valuable time while reporting cytopathology. **Color Atlas of Pulmonary Cytopathology** Jennifer A. Young, 1985 A lavish visual survey of pulmonary cytopathology featuring over 400 full color illustrations, this informative atlas presents diagnostic specimens of common and uncommon conditions including examples of cytological problems. The majority of illustrations are of Papanicolaou stained material, although a range of other special stains is also demonstrated. A general introduction to each chapter cites the principal and most recent literature, and the editor provides detailed comments on each specimen illustrated. *Color Atlas and Text of Pulmonary Pathology* Philip
