

Oil-Fired Furnaces

INTRODUCTION

The 58 Series Oil-Fired Furnaces are available in Upflow (58HV), Lobby Upflow (58HL), Downflow (58HC), and Horizontal (58HH) models. The units are designed in capacities to heat the smallest prefabricated or the largest custom built home, a single office or a large store or plant. See Fig. 1 and Table 1 for furnace dimensions and physical data. See Table 2 for blower data.

Furnaces may be matched with certain 24 Series cooling coils to form combination heating/cooling systems (see Table 2) and employed with modifiers and electronic air cleaners to form complete controlled environment systems.

These units are tested and approved for use with No. 1 or 2 (light) fuel oil.

The furnaces are shipped as a packaged unit. The burners and controls are supplied as standard equipment, and may be shipped in a separate carton or completely wired and assembled in place. (See Installation Procedures - Furnaces.)

The control compartment, which is an integral part of these furnaces, is totally enclosed to provide a safe, compact, clean, and quiet control area.

When unpacking unit, should any in-transit damage be observed, file claim with transportation agency.

This publication covers furnace installation, start-up, and service. For necessary installation details, refer to applicable installation literature.
