Mancini, 2010-07-15 Lewis Mancini M D posits that all past present and future earthlings will become extremely wealthy famous intellectually brilliant and immortal via reproducible out of body experiences brain stimulation the Internet GPS and other scientific and technological advances These developments will all take place within the remainder of the current century Moreover the mind or soul of all earthlings will be revealed to be ageless and deathless while the notion of death will be revealed to be nothing more than a cruelly punitive illusion foisted upon us by an envious universe filled with angry Earth watchers who resent the actual center stage status of our planet All human mind particles regardless of earthly

birth date stick together for eternity due to the forces that exist between and among us These forces include the strong nuclear force the weak nuclear force electro magnetic attraction gravity and the force of sentimental affection or love by which all conscious subconscious and even unconscious particles are at least potentially strongly motivated Mancinis work is the exploration of the concept of the human mind particle a possible interface between science and religion and the ultimate future for all residents of earth

Celebrity Morals and the Loss of Religious Authority John Portmann, 2019-04-30 This book examines American popular culture to demonstrate that celebrities have superseded religious figures as moral authorities As trust in religious institutions has waned over recent decades the once frivolous entertainment fringe has become the moral center Young people and voters increasingly take cues from actors and athletes The book begins by offering a definition of celebrity and showing that the profile of celebrities has changed dramatically particularly since the 1960s They can now chart their own careers manage their own personal lives and weigh in on pressing moral issues in a manner that hasn't always been the case This can be to the good it is argued for some counterintuitive reasons Very few stars pretend to be moral exemplars unlike the frequently hypocritical elites they have replaced Others however are seemingly poorly qualified to speak on complex moral issues In the end it also turns out that who tells us how to feel about any moral issue counts at least as much as what they tell us This is a fresh look at the impact of celebrity culture on contemporary morality and religious authority As such it will be of great use to academics working in religious studies and ethics as well as popular culture and media studies

Unequal Before Death Marcelline Block, Christina Staudt, 2012-03-15 Death has been deemed the great equalizer but each journey towards our shared ultimate fate is unique The length of our lives the quality of our last days how our deaths are perceived by others and the handling of our remains are governed by nature and many socio cultural factors Unequal Before Death is an edited collection that addresses inequalities surrounding death from the perspectives of scholars in a wide range of humanistic and social science disciplines including art history anthropology Film and media studies political science popular culture psychology religion sociology and statistics The majority of the chapters of this interdisciplinary anthology are revised versions of papers presented at the second Austin H Kutscher Memorial Conference entitled Unequal Before Death organized by the Columbia University Seminar on Death in March 2010 and attended by leading experts in academia healthcare and the not for profit sector The purpose of this volume is to bring attention to the many inequalities affecting the end of life experience and to encourage collaborative research and action that can improve the experience for the dying and those around them This volume does not question the truism of death as the ultimate equalizer but rather seeks to explore the many ways in which the final journey is not equal
