Causation And The Principle Of Sufficient Reason The God Series 21:

On Schopenhauer's Fourfold Root of the Principle of Sufficient Reason White, 2021-09-20 Dr White's book is the first to be written on Schopenhauer's important foundation work *On the Fourfold Root of the Principle of Sufficient Reason*. It presents the arguments and analyses of Schopenhauer's work in systematic form and assesses the worth of those arguments and analyses with particular emphasis on their positive merits. Schopenhauer divides the phenomenal world into four classes of object, discussing each of these in turn, and the chapters of White's book generally follow that order. But the book also contains a chapter of introduction showing how the Fourfold Root fits into Schopenhauer's general scheme of philosophical thought and an appendix outlining the historical background to Schopenhauer's views. Given that it is the only work of its kind, White's book will be of use and interest to all students and it is written in such a way that it should be intelligible to the beginner in Schopenhauer as well as helpful to the more established student.

Ontological Mathematics: How to Create the Universe Mike Hockney, This book explains how the entire universe can be created using just two ingredients: nothing at all and the Principle of Sufficient Reason (PSR). Why would you need anything else? Nothing else could do the job. Existence, believe it or not, is just dimensionless mathematical points moving according to the PSR. Come and find out how the PSR accomplishes it.

Five Proofs for the Existence of God Edward Feser, 2017-08-18 *Five Proofs of the Existence of God* provides a detailed, updated exposition and defense of five of the historically most important but in recent years largely neglected philosophical proofs of God's existence: the Aristotelian proof, the Neo-Platonic proof, the Augustinian proof, the Thomistic proof, and the Rationalist proof. This book also offers a detailed treatment of each of the key divine attributes: unity, simplicity, eternity, omnipotence, omniscience, perfect goodness, and so forth, showing that they must be possessed by the God whose existence is demonstrated by the proofs. Finally, it answers at length all of the objections that have been leveled against these proofs. This book offers as ambitious and complete a defense of traditional natural theology as is currently in print. Its aim is to vindicate the view of the greatest philosophers of the past: thinkers like Aristotle, Plotinus, Augustine, Aquinas, Leibniz, and many others that the existence of God can be established with certainty by way of purely rational arguments. It thereby serves as a refutation both of atheism and of the fideism which gives aid and comfort to atheism.

A Companion to Kant Graham Bird, 2009-11-09 This Companion provides an authoritative survey of the whole range of Kant's work, giving readers an idea of its immense scope, its extraordinary achievement, and its continuing ability to generate philosophical interest. Written by an international cast of scholars, it covers all the major works of the critical philosophy as well as the pre-critical works. Subjects covered range from mathematics and philosophy of science through epistemology and metaphysics to moral and political philosophy.

Introduction to the Human Sciences Wilhelm Dilthey, 1988 As a contribution to the issue of the methodologies of the humanities and social sciences, the *Introduction* works to address issues of the human sciences and their place in relations to natural sciences.

Progress in Theology Gijsbert van den Brink, Rik Peels, Bethany

Sollereder,2024-07-10 This book explores the intriguing relationship between theology science and the ideal of progress from a variety of perspectives While seriously discussing the obstacles and pitfalls related to the notion of progress in theology it argues that there are in fact many different kinds of progress in theology It considers how this sheds positive light on what theologians do and suggests that other disciplines in the humanities can equally profit from these ideas The chapters provide tools for making further progress in theology featuring detailed case studies to show how progress in theology works in practice and connecting with the role and place of theology in the University The book rearticulates in multiple ways theology s distinctive voice at the interface of science and religion *A Companion to Metaphysics* Jaegwon Kim,Ernest Sosa,Gary S. Rosenkrantz,2009-03-12 Fully extended and revised *A Companion to Metaphysics* 2ndEdition includes a section of detailed review essays fromrenowned metaphysicians and the addition of more than 30 newencyclopediaic entries taking the number of entries to over 300 Includes revisions to existing encyclopediaic entries Features more than 30 all new A to Z entries Offers a section of in depth essays from renownedmetaphysicians Provides the most complete and up to date reference guide forstudents and professionals alike **Efficient Causation** Tad M. Schmaltz,2014-09-26 Causation is now commonly supposed to involve a succession that instantiates some law like regularity *Efficient Causation A History* examines how our modern notion developed from a very different understanding of efficient causation This volume begins with Aristotle s initial conception of efficient causation and then considers the transformations and reconsiderations of this conception in late antiquity medieval and modern philosophy ending with contemporary accounts of causation It includes four short Reflections that explore the significance of the concept for literature the history of music the history of science and contemporary art theory **Actualitas: Philosophy-Art for the 21st Century** Mike Gellerman,2025-03-21 Philosophy offers more than a momentary diversion it provides valuable insights for gaining personal control and making important decisions Imagine a lone leaf drifting in an autumn breeze coasting on an updraft before floating to the ground eventually broken down by the elements and recirculated into the soil Embracing personal responsibility without scapegoats exemplifies the essence of carpe diem seize the day Throughout history philosophy has grappled with the concept of fear though modern times have seen this domain largely conceded to pseudosciences often offering solutions through natural and synthetic drugs Aristotle had much to say about fear the things we fear are fearful and such things are broadly speaking evils e g disgrace poverty sickness friendlessness death Probably one ought not to fear poverty or disease nor in general anything that is not one s own fault **Metaphysics** Lukáš Novák,Daniel D. Novotný,Prokop Sousedík,David Svoboda,2013-05-02 Throughout the greater part of the twentieth century both in the analytic and continental traditions metaphysics was deemed to be pass The last few decades however have witnessed a remarkable growth of interest among analytic philosophers in various traditional metaphysical topics such as modality truth causality etc which resulted in the emergence of various forms of analytic metaphysics The new forms of metaphysics differ from its traditional forms mostly in their methodology we may

notice various applications of contemporary formal logical techniques and in the range of proposed solutions to particular problems Besides these and other differences however there are also many similarities and there are even some who intentionally develop traditional metaphysical themes using the contemporary analytical methods All these developments call for detailed exploration which is the general goal of the present publication Metaphysics Aristotelian Scholastic Analytic The publication is the fruit of the conference which took place in Prague in 2010 and which had for its aim to bring together those willing to explore relations between the traditional and contemporary concerns both from among the leading analytic philosophers working in metaphysics and the historians of philosophy devoted to the study of the metaphysical tradition The specific focus of the conference was a re examination of topics such as categories metaphysical structure substance and accident existence modalities and predication
