

Leica Cyclone 5.8 VIEWER & VIEWER Pro

Powerful yet affordable 3D point cloud visualization, measurement, markup, and data exchange software for professionals

Accurate distance measurements can easily be created to enhance data analysis

Leica Cyclone VIEWER and VIEWER Pro

provide professionals with powerful 3D viewing and navigation of rich High-Definition Survey™ (HDS™) point cloud data and associated 3D models. Cyclone VIEWER is free standalone software for 3D viewing only, while affordable Cyclone VIEWER Pro provides additional, valuable measurement, markup, and data exchange capabilities. Professionals can analyse laser scan and 3D model datasets quickly and collaborate for better informed project decisions.

Powerful 3D Navigation and Visualization

Leica Cyclone VIEWER and VIEWER Pro have many features that let users work efficiently with rich laser scan data sets. Users can smoothly fly through and around point clouds, as well as pan, zoom and rotate views. Cyclone's Level of Detail (LOD) graphics display engine provides highly efficient 3D visualization and manipulation of even the largest point clouds and models.

For improved comprehension of dense point clouds, advanced visualization modes allow users to "see through" walls, apply shaded rendering, enhance edge display, and more. Additional visualization tools such as layers and 3D Limit Boxes allow users to focus in on specific areas of laser scan and model data.

Measurement and Markup

Cyclone VIEWER Pro's rich set of complex 3D measurement tools enables users to measure directly between selected scan points and/or modeled surfaces. Measurements stored during one "session" can be recalled and managed. Users can also easily markup scan images with redline tools to effectively communicate with others. "Redline Manager" allows users to handle multiple markups at once, including appropriate view points for individual redlines.

Collaboration via Databases

Cyclone's unique Object Database Client/Server architecture lets multiple users operate on the same scan data set simultaneously. Users can collaborate directly and share data across networks.

Data Management and Exchange

Leica Cyclone VIEWER Pro also serves as a versatile data exchange module. Numerous import and export formats are supported. Previously modeled content can be easily exported into industry standard formats for further use in other software. Industry standard, customizable and vendor-specific point cloud ASCII data export formats facilitate data exchange with other 3D point cloud processing and CAD packages.

Integrated Suite of Leica Geosystems Software Modules

Other modules include Leica Cyclone SCAN, Leica Cyclone REGISTER, Leica Cyclone MODEL, Leica Cyclone SERVER, Leica Cyclone II TOPO, Leica Cyclone PUBLISHER, and Leica Truview for free panoramic viewing-measuring-markup of laser scans by anyone. The Leica CloudWorx family of applications allows users to efficiently view and work with scan data directly within popular CAD applications.
