The Civic Imagination Gianpaolo Baiocchi, Elizabeth A. Bennett, Alissa Cordner, Peter Taylor Klein, Stephanie Savell, 2014 The Civic Imagination provides a rich empirical description of civic life and a broader discussion of the future of democracy in contemporary America Five researchers observed and participated over the course of a year in 7 civic organizations in a mid sized US city They draw on this ethnographic evidence to map the civic imaginations that motivate citizenship engagement in America today The book unpacks how contemporary Americans think about and act toward positive social and political change The authors findings challenge contemporary assertions of American apathy *Artists, Cosmopolitanism, and the Civic Imagination* Maria Rovisco, 2025-02-17 Artists Cosmopolitanism and the Civic Imagination unpacks the political agency of artists by looking at artists as moral reflexive and political agents Do artists play a role in civil society Can artists make a difference in the world In what ways do artists act politically To address these questions this book moves away from a focus on social organisation and the production of art to ask how artists attach meaning to their interventions in social and political conditions Maria Rovisco draws from in depth interviews with UK based visual artists and theatre practitioners with a migrant background and semiotic analysis of a theatre play visual artworks and film texts to argue that artists are quintessential cosmopolitans who care deeply about changing society for the better By explaining how artists get involved in cross cultural encounters this book reveals the processes of listening reflection imagination social learning and moral intentionality through which artists imagine and realise their visions of a better world In so doing it offers a new direction in thinking about the intersection of art and politics by showing how artists play a crucial role in building a civic culture outside traditional sites of political participation This book will be essential reading for students and scholars across the social sciences and the humanities with interests in migration citizenship and the public sphere cultural sociology media and culture cosmopolitanism and art **Group Life** Gary Alan Fine, Tim Hallett, 2022-10-04 Sociological analysis is replete with debates about micro and macro individual and society but all too often these miss the point interacting groups are the hinge that connects the two To understand how structures matter and how individuals navigate them we must take groups and people in local communities seriously Gary Alan Fine and Tim Hallett skillfully argue that sociologists have the

obligation to examine the role of small communities in the creation of both the interaction order and structural realities With novel concepts and rich ethnographic examples this book describes how group commitments shape selves and society emphasizing the importance of a meso level approach to social organization Fine and Hallett provide new models of identity culture conflict and control and consider how a network of groups can provide insight into extended communication channels and social media lattices Ultimately they show that despite the importance of institutions and individuals group life is the fundamental building block of community This timely book makes the case for a local sociology that includes sociality It will be a welcome resource for students and sociologists and a necessary call to action for the discipline as a whole

energy in equitable ways Slow Tourism, Food and Cities Michael Clancy, 2017-08-23 Slow Food began in the late 1980s as a response to the spread of fast food establishments and as a larger statement against globalization and the perceived deterioration of modern life. Since then, slow practices have permeated into other areas including cities and territories and travel and tourism. This book provides an in-depth examination of slow food, tourism, and cities, demonstrating how these elements are intertwined with one another as part of the modern search for the good life. Part 1 locates the slow concept within the larger social setting of modernity and investigates claims made by the slow movement, examining aesthetic and instrumental values inherent to it. Part 2 explores the practices and places of slow, containing both conceptual and empirical chapters in Italy, the birthplace of the movement. Part 3 provides a comparative perspective by examining the practices in Spain, the UK, Germany, and Canada. Slow Tourism, Food and Cities offers key theoretical insights and alternative perspectives on the varying practices and meanings of slow from a cultural, sociological, and ethical perspective. It is a valuable text for students and scholars of sociology, geography, urban studies, social movements, travel and tourism, and food studies.
