Civics In Practice Teacher Edition 2009:

The Rise and Fall of Civic Education Michael Learn, 2024-09-16 Social studies is a field in crisis. The crisis stems from failure to establish the very foundation of social studies purpose in public education: civic education. Social studies advocates have never put forth a coherent method for teaching civic education because policymakers and the public have been unable to agree upon a general definition of civic education. This issue has disrupted the field since the early days. As educators sought to include civic education within public schools as a dedicated field, social studies evolved into a blending of history, social sciences, and civic education. Social studies' evolution never resolved the differences between the three, with each discipline striving to control the narrative. Instead of creating a unified field, the disciplines devalued social studies and thus any discipline associated with it. The Rise and Fall of Civic Education: The Battle for Social Studies in a Shifting Historical Landscape investigates the changing definitions and purposes ascribed to social studies in the United States through time. This result is viewed through the rising tensions from culture wars as America's divisive politics fight to control the narrative of the disciplines within social studies.

Diversity, Transformative Knowledge, and Civic Education James A. Banks, 2020-03-12 WINNER 2021 Society of Professors of Education Outstanding Book Award. The essays collected in this book by James A. Banks, a foundational figure in the field of multicultural education, illuminate the interconnection between the author's work on knowledge construction and civic education. In pieces both poignant and personal, Banks shares some of his most groundbreaking and innovative work. Diversity, Transformative Knowledge, and Civic Education aims to unpack the citizenship education dilemma whereby education programs strive to teach students democratic ideals and values within social, economic, political, and educational contexts that contradict justice, equality, and human rights. For change to take place, students need to internalize democratic values by directly experiencing them in transformative classrooms and schools that are envisioned and described in this book. Drawn from Banks' formidable canon, this collection highlights the conceptual, curricular, and pedagogical issues related to this dilemma and signals a fundamental shift toward transformative citizenship education. Students, scholars, and educators in the fields of multicultural education, civic education, social studies education, comparative education, and the foundations of education will find this book to be a valuable resource for discussion and discovery.

Global Migration, Diversity, and Civic Education James A. Banks, Marcelo Suárez-Orozco, Miriam Ben-Peretz, 2016. Mass migration and globalization are creating new and deep challenges to education systems the world over. In this volume, some of the world's leading researchers in multicultural education and immigration discuss critical issues related to cultural sustainability, structural inclusion, and social cohesion. The authors consider how global migration is forcing nation-states to reexamine and reinvent the ways in which they socialize and educate diverse groups for citizenship and civic engagement. These chapters also address how schools can help migrant and immigrant groups attain the knowledge, values, and skills required to become fully participating citizens while retaining important aspects of their home community.
