The NGT™ SRx Transceiver is specially designed to provide comprehensive and advanced High Frequency (HF) communication solutions. It is cost-effective and can meet your base and mobile HF communications requirements for both voice and data operation.

While incorporating the usual features of Codan's leading edge HF radio technology and renowned reliability, the NGT™ SRx has been built as a one radio solution to suit all conditions and configurations.

Codan's user-friendly handset interface and self-test capabilities ensure the NGT™ SRx is easier to install, operate and maintain than other transceivers. It is also fully interoperable with other HF transceivers to provide seamless HF network integration.

EASE OF USE

Codan's NGT™ SRx is designed for quick deployment in base and mobile configurations. The specially designed mounting equipment and flying lead cable interfaces enable the NGT™ SRx to be installed quickly and with minimum requirement for space while still providing ease of access for servicing.

The handset can be mounted in any position for easy access and viewing; especially important in a vehicle where space is limited. With the comprehensive user-friendly interface and full control over the handset, a driver or passenger can operate the transceiver from any location within a vehicle.

Programmable password protected access rights can be used to tailor the transceiver feature set and capabilities to your specific user requirements, which ensures the operator is not presented with unnecessary complexity.

Extensive Built-In-Test Equipment (BITE) capability makes it easy for users or network administrators to analyse transceiver performance.

The 50 ohm antenna output is fully protected against any load conditions including short circuit, open circuit and high Voltage Standing Wave Ratio (VSWR), which can destroy other transceivers. In the event of poor VSWR, an error is reported to the handset. VSWR can also be reviewed via the handset at any time.
