Johnson, 2015-12-24 For most the mere mention of lice forces an immediate hand to the head and recollection of childhood experiences with nits medicated shampoos and traumatic haircuts But for a certain breed of biologist lice make for fascinating scientific fodder especially enlightening in the study of coevolution In this book three leading experts on host parasite relationships demonstrate how the stunning coevolution that occurs between such species in microevolutionary or ecological time generates clear footprints in macroevolutionary or historical time By integrating these scales *Coevolution of Life on Hosts* offers a comprehensive understanding of the influence of coevolution on the diversity of all life Following an introduction to coevolutionary concepts the authors combine experimental and comparative host parasite approaches for testing coevolutionary hypotheses to explore the influence of ecological interactions and coadaptation on patterns of diversification and codiversification among interacting species Ectoparasites a diverse assemblage of organisms that ranges from herbivorous insects on plants to monogenean flatworms on fish and feather lice on birds are powerful models for the study of coevolution because they are easy to observe mark and count As lice on birds and mammals are permanent parasites that spend their entire lifecycles on the bodies of their hosts they are ideally suited to generating a synthetic overview of coevolution and thereby offer an exciting framework for integrating the concepts of coadaptation and codiversification *Advances in Marine Biology*, 2019-06-19 *Advances in Marine Biology* Volume 82 the latest release in a series that has been providing in depth and up to date reviews on all aspects of marine biology since 1963 updates on many topics that will appeal to postgraduates and researchers in marine biology fisheries science ecology zoology and biological oceanography Chapters in this new release include Predatory Bivalves The Oceanography of the Eastern English Channel Past Present and Future Parasites and Pathogens in Seabirds Effects and Wider Ecological Implications Progress in Marine Genomics and Bioinformatics and more

Schoonhoven,Joop J. A. van Loon,Marcel Dicke,2005-12 Half of all insect species are dependent on living plant tissues consuming about 10% of plant annual production in natural habitats and an even greater percentage in agricultural systems despite sophisticated control measures Plants are generally remarkably well protected against insect attack with the result that most insects are highly specialized feeders The mechanisms underlying plant resistance to invading herbivores on the one side and insect food specialization on the other are the main subjects of this book For insects these include food plant selection and the complex sensory processes involved with their implications for learning and nutritional physiology as well as the endocrinological aspects of life cycle synchronization with host plant phenology In the case of plants exposed to insect herbivores they include the activation of defence systems in order to minimize damage as well as the emission of chemical signals that may attract natural enemies of the invading herbivores and may be exploited by neighbouring plants that mount defences as well Insect Plant Biology discusses the operation of these mechanisms at the molecular and organismal levels in the context of both ecological interactions and evolutionary relationships In doing so it uncovers the highly intricate antagonistic and mutualistic interactions that have evolved between plants and insects The book concludes with a chapter on the application of our knowledge of insect plant

interactions to agricultural production This multidisciplinary approach will appeal to students in agricultural entomology plant sciences ecology and indeed anyone interested in the principles underlying the relationships between the two largest groups of organisms on earth plants and insects BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved
