Cognitive Archaeology And Human Evolution:

Cognitive Archaeology and Human Evolution Sophie A. de Beaune, Frederick L. Coolidge, Thomas Wynn, 2009-06-22 Cognitive Archaeology and Human Evolution presented new directions in the study of cognitive archaeology Seeking to understand the conditions that led to the development of a variety of cognitive processes during evolution it uses evidence from empirical studies and offers theoretical speculations about the evolution of modern thinking as well The twelve essays written by an international team of scholars represent an eclectic array of interests methods and theories about evolutionary cognitive archaeology Collectively they consider whether the processes in the development of human cognition simply made a better use of anatomical and cerebral structures already in place at the beginning of hominization They also consider the possibility of an active role of hominoids in their own development and query the impact of hominoid activity in the emergence of new cognitive abilities [An Introduction to Evolutionary Cognitive Archaeology](#) Thomas Wynn, Frederick L. Coolidge, 2022-04-19 An Introduction to Evolutionary Cognitive Archaeology is the first concise introduction that lays out the epistemological foundations of evolutionary cognitive archaeology in a way that is accessible to students The volume is divided into three sections The first section situates cognitive archaeology in the pantheon of archaeological approaches and distinguishes between ideational cognitive archaeology and evolutionary cognitive archaeology This is followed by a close look at the nature of cognitive archaeological inferences and concludes with brief summaries of the major methods of evolutionary cognitive archaeology The second section of the book introduces the reader to a variety of cognitive phenomena that are accessible using the methods of cognitive archaeology memory technical cognition spatial cognition social cognition art and aesthetics and symbolism and language The third section presents a brief outline of hominin cognitive evolution from the perspective of evolutionary cognitive archaeology The authors divide the archaeological record into three major phases The Bipedal Apes 3 3 million 1 7 million years ago The Axe Age 1 7 million 300 000 years ago and The Emergence of Modern Thinking 300 000 12 000 years ago An Introduction to Evolutionary Cognitive Archaeology is an essential text for undergraduate students graduate students and scholars across the behavioral and social sciences interested in learning about cognitive archaeology including psychologists philosophers anthropologists and archaeologists **Squeezing Minds From Stones** Karenleigh A. Creativity in Human Evolution and Prehistory Steven Mithen, 2005-08-10 We live in a world surrounded by remarkable cultural achievements of human kind Almost every day we hear of new innovations in technology in medicine and in the arts which remind us that humans are capable of remarkable creativity But what is human creativity The modern world provides a tiny fraction of cultural diversity and the evidence for human creativity far more can be seen by looking back into prehistory The book examines how our understanding of human

creativity can be extended by exploring this phenomenon during human evolution and prehistory The book offers unique perspectives on the nature of human creativity from archaeologists who are concerned with long term patterns of cultural change and have access to quite different types of human behaviour than that which exists today It asks whether humans are the only creative species or whether our extinct relatives such as Homo habilis and the Neanderthals also displayed creative thinking It explores what we can learn about the nature of human creativity from cultural developments during prehistory such as changes in the manner in which the dead were buried monuments constructed and the natural world exploited In doing so new light is thrown on these cultural developments and the behaviour of our prehistoric ancestors By examining the nature of creativity during human evolution and prehistory these archaeologists supported by contributions from psychology computer science and social anthropology show that human creativity is a far more diverse and complex phenomena than simply flashes of genius by isolated individuals Indeed they show that unless perspectives from prehistory are taken into account our understanding of human creativity will be limited and incomplete
