

Operation Guide 2608 2638 2688 CASIO

Getting Acquainted

Comprehend the operation selection of the CASIO watch. To get the most out of your purchase, the functions described here must be used and kept in mind for later reference when necessary.

- This is a watch that does not have a time zone that corresponds to the Greenwich Mean Time of Montreal at -05 hours. Because of this, the mode controlled timekeeping and World Time functions will not display the correct time for Newfoundland and Canada.

Display is a watch to display light for change the battery before using it. However, use the watch battery as its battery is changed by exposure to bright light.

- We want to read "Battery" of this manual for important information you need to know when replacing the watch battery.

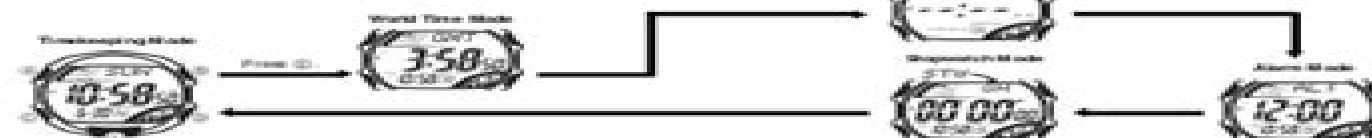

If the display of the watch is blank...

- If the sleep indicator (the SLDR) is on the display, it means that the display is blank because the watch is in Power Saving Function mode. When it is in power saving mode, the display automatically turns off after sleeping and when a sleep mode is entered, your watch is left in an environment to sleep for a short period.
- The watch returns from the sleep mode if you press in.
- The watch returns from the sleep mode if you press in a watch button, if you press any button, or if you press the watch battery cover flap for reading.
- Refer to the section for the sleep mode in the manual.
- See "Power Saving Function" for more information.

General Guide

- Press (2) to change from mode to mode.
- In any mode, press (2) to return to the display.

Radio-controlled Atomic Timekeeping

- This watch receives a time calibration signal and updates its timekeeping settings. The time calibration signal includes both the standard time and the Daylight Time (summer time) data.
- This watch is designed to pick up the time calibration signal received from the radio-controlled Standard Time (summer time) station.
- Reception is possible within North America.
- The time "World Atomic" in the watch indicates that the time is received from the radio-controlled Standard Time and Atomic.

Current Time Setting

- The watch automatically adjusts its time setting in accordance with the time calibration signal. You can also perform a manual procedure to set the time and date, when necessary.
- The first thing you should do after purchasing the watch is to set your Home City, which is the city where you will normally use the watch. For more information, see "To set your Home City" below.
- When using the watch outside the range of the transmitter in Port Collins, you need to manual a setting of the time as required. See "Timekeeping" for information about manual setting.

To set your Home City

1. In the Timekeeping Mode, hold down (2) until the city code starts to flash, which indicates the setting screen.
2. Use (2) and (3) to select the city code that you want to use as your Home City.
 - The list only has the city codes for major cities in North America.
 - For (2) (Push) indicator:
 - Los Angeles, San Francisco, Las Vegas, Seattle, Vancouver, Toronto
 - For (3) (Pull) indicator:
 - Denver, St. Paul, Salt Lake City, Dallas
 - For (2) (Push) indicator:
 - Chicago, Houston, Dallas-Fort Worth, New Orleans, Oklahoma, Phoenix
 - For (3) (Pull) indicator:
 - New York, Dallas, Miami, Boston, Montreal
3. Hold down (2) until the city code that corresponds to Newfoundland is displayed.
4. Press (2) twice to exit the setting screen.
5. The first press of (2) displays the 12:00 hour setting screen. Pressing (2) again sets the setting screen.

Important!

- Otherwise, your watch should show the correct time as soon as you set it. Your Home City code, if it does not, it should adjust automatically after the next automatic reception in the middle of the night. You can also perform manual setting on your watch and display manually.
- If you are in an area that does not use Daylight Saving Time (summer time), turn off the DST setting.
- Time Calibration Signal Reception: To use the time calibration signal, you can receive the time calibration signal automatically and manually.

About This Manual

- The operation procedures for Modules 2608, 2638 and 2688 are identical. All of the functions in this manual show Module 2608.
- Other operations are indicated by the label shown in the illustration.
- Each section starts with a procedure for the watch. When you need to perform operations in watch mode, it will be indicated and technical information can be found in the "Reference" section.

Auto Reception

- With this feature, the watch automatically picks up the time calibration signal four times a day at 2:00 a.m., 4:00 a.m., 6:00 a.m., and 8:00 a.m. For more information, see "About Auto Reception".

Manual Reception

- To manually receive the time calibration signal, press (2) to perform manual reception.

Important!

- When going ready to receive the time calibration signal, position the watch at a place where the signal reception is possible. With the 12 o'clock side facing towards a window. Of course there are no need signal reception.

- The watch should not be under the influence of strong magnetic fields.

- Proper signal reception can be affected if you use the watch under the conditions listed below.

- Signal reception is normally better at night than during the day.
- Time calibration signal reception takes from 10 to 30 minutes, but in some cases it can take as long as 120 minutes. Take care that you do not perform any function operation or make any watch adjustment during this time.

- Under good reception conditions, signal reception is possible within a radius of about 2,000 miles (3,200 kilometers) from the Port Collins transmitter.
