

Why a “Companion Guide?”

- Consolidated CDA (C-CDA) Implementation Guide (IG) **not enough for implementers**
 - Call for public collection of implementation guidance, **sample clinically-valid documents** and testing procedures
- 2014 Edition CEHRT requirements (for Meaningful Use Stage 2) **do not provide technical guidance** for implementations using the C-CDA IG
- No practical roadmap for **using the C-CDA IG for implementations** to meet the needs of clinicians and achieve Meaningful Use

include chapters on HL7 and or SNOMED but these are usually quite short and cannot provide even an adequate introduction There is little of much value on the Internet or in journals or conference proceedings Digital Health Approach for Predictive, Preventive, Personalised and Participatory Medicine Lotfi Chaari,2019-07-10 This collection entitled Digital Health for Predictive Preventive Personalized and Participatory Medicine contains the proceedings of the first International conference on digital healthtechnologies ICDHT 2018 Ten recent contributions in the fields of Artificial Intelligence AI and machine learning Internet of Things IoT and data analysis all applied to digital health This collection enables researchers to learn about recent advances in the above mentioned fields It brings a technological viewpoint of P4 medicine Readers will discover how advanced Information Technology IT tools can be used for healthcare For instance the use of connected objects to monitor physiological parameters is discussed Moreover even if compressed sensing is nowadays a common acquisition technique its use for IoT is presented in this collection through one of the pioneer works in the field In addition the use of AI for epileptic seizure detection is also discussed as being one of the major concerns of predictive medicine both in industrialized and low income countries This work is edited by Prof Lotfi Chaari professor at the University of Sfax and previously at the University of Toulouse This work comes after more than ten years of expertise in the biomedical signal and image processing field *Informatics in Medical Imaging* George C.
