

FLU VACCINE: GET THE FACTS

YOUR BEST PROTECTION AGAINST FLU

Millions of people get flu every year, hundreds of thousands of people are hospitalized and thousands or tens of thousands of people die.

The Centers for Disease Control and Prevention (CDC), public health professionals, and our practice recommend that everyone 6 months of age and older should get a flu vaccine every year. Flu vaccination can reduce flu illnesses, doctor's visits, and missed work and school due to flu, as well as prevent serious flu complications that can result in hospitalization and even death.^{1,2} A flu vaccine is the best way to help prevent flu and its potentially serious complications. Remember that flu vaccine not only protects you, but it also can help protect those around you.

FLU VACCINE REDUCES YOUR RISK OF FLU

During the 2019-2020 influenza season, influenza vaccination prevented an estimated 7.5 million illnesses, 105,000 hospitalizations, and 6,300 deaths associated with influenza.³

Recent studies show that flu vaccination reduces the risk of flu illness by between 40% and 60% among the overall population during seasons when most circulating flu viruses are well-matched to the flu vaccine.⁴

During the 2019-2020 influenza season, there were 199 influenza-related pediatric deaths reported to CDC. A CDC study was the first of its kind to show that influenza vaccination can significantly reduce a child's risk of dying from influenza.⁵

While some people who get a flu vaccine still get sick, vaccination can make their illness less severe. Two recent studies among hospitalized flu patients showed that flu vaccination reduced intensive care unit admissions and duration of hospitalization.⁶

Remember that a flu vaccine not only protects you, but it also can help protect those around you, including people who are at higher risk for serious flu illness, like babies, young children, older adults, pregnant people, and people with certain chronic health conditions.

FLU VACCINATION ESPECIALLY IMPORTANT FOR SOME

Flu vaccination is especially important for people who are at higher risk of developing serious complications from flu, including children younger than 5, pregnant people, adults 65 and older, and people with certain chronic health conditions, such as diabetes, heart disease, and asthma.

PROVEN SAFETY RECORD

For more than 50 years, hundreds of millions of Americans have safely received seasonal flu vaccines and there has been extensive research supporting its safety.⁷ Side effects from flu vaccination are generally mild, especially when compared to symptoms of flu.⁷

Talk to someone in our office about getting a flu vaccine this fall. Our staff is ready to answer your questions.

Cdc Guidelines For Flu Shots

**Nell Tharpe, Cindy L. Farley, Robin G.
Jordan**

Cdc Guidelines For Flu Shots:

Vaccine Science and Immunization Guideline Pamela G. Rockwell, DO, 2017-11-03 This book is a comprehensive resource on vaccines and immunizations for primary care physicians advanced practice providers and trainees We are now seeing a rise in measles and the potential for rises in other previously rare infectious diseases significantly due to public and physician misconceptions and misinformation about vaccines The text addresses this issue by consolidating historical and current advances in vaccine science from how vaccines are developed to CDC recommendations on how and when to administer them Expert authors also address barriers to improving vaccination rates in the U S and offer evidence based recommendations on overcoming those barriers This is an essential guide for primary care physicians family physicians pediatricians internists residents medical students mid level providers and learners for understanding vaccines and improving preventative care for their patients

Graph-based Natural Language Processing and Information Retrieval Rada Mihalcea, Dragomir Radev, 2011-04-11 Graph theory and the fields of natural language processing and information retrieval are well studied disciplines Traditionally these areas have been perceived as distinct with different algorithms different applications and different potential end users However recent research has shown that these disciplines are intimately connected with a large variety of natural language processing and information retrieval applications finding efficient solutions within graph theoretical frameworks This book extensively covers the use of graph based algorithms for natural language processing and information retrieval It brings together topics as diverse as lexical semantics text summarization text mining ontology construction text classification and information retrieval which are connected by the common underlying theme of the use of graph theoretical methods for text and information processing tasks Readers will come away with a firm understanding of the major methods and applications in natural language processing and information retrieval that rely on graph based representations and algorithms
