the concept of promoting democracy itself is not uniformly accepted It has become a slogan that attracts both fervent support and grave condemnation For Burnell promoting democracy refers to a wide range of non coercive attempts to spread democracy abroad for whatever reason At its heart it is political intervention in the domestic affairs of other countries that seeks to affect the distribution of power whether by patient and non violent involvement or more urgent action democracy assistance projects form a core activity Burnell holds that participation in the democracy assistance industry will continue to grow However the industry s progress up until now has in part been contingent on the progress of democratization itself The slowdown that is currently happening in the advance of freedom and democracy around the world and the strength shown by leading authoritarian or semi authoritarian regimes must raise questions about the outlook for democracy promotion If democracy promotion and assistance are to be fit for the future then the need for a broadly based appropriately contextualized examination of the policy and the performance is greater now than at any time in the past **A**
