

The background of the slide is a deep space image. It features a central, bright yellow star or galaxy core. Surrounding this core are several concentric, glowing green lines that represent orbits or the expansion of the universe. The overall color palette is dark, with deep blues and purples in the outer regions, transitioning to a lighter, more vibrant green and yellow near the central light source. The text is overlaid on this background.

Cosmic Creationism Ken Wilbers Theory Of Evolution:

Cosmic Creationism: Ken Wilber's Theory of Evolution David Lane, 2014-05-09 This book provides an overview of Ken Wilber's view of evolutionary theory in light of his Integral philosophy. It also provides a pointed critique of why Wilber consistently misreads and misunderstands Darwin's theory of evolution by natural selection.

Cosmic Creationism David Christopher Lane, 2014-06-19 I first critiqued Ken Wilber on his misunderstanding of evolution back in 1996 right after his book *A Brief History of Everything* was published. It has now been 18 years and if anything Wilber has become even more firmly entrenched in his new brand of creationism which ironically mimics much of what Christian fundamentalists object to about Darwinianism. And Wilber doesn't have to look far for alternative theories about how the universe came into being: see Stephen Hawking's *Grand Design* or Sean Carroll's *From Eternity to Here* for starters without resorting to Eros pushing Chaos aside inside an atom so it can mate with others and create anew. Yes we can debate the merits of evolution and astrophysics in trying to understand how the universe and life came into being. But in so doing it is important to accurately present the arguments we oppose. Wilber has shown a tendency to abdicate that responsibility in his rush to push his creationist agenda. In so doing and by avoiding the pertinent criticisms of Frank Visser and others Wilber continues to tarnish his intellectual reputation. An integral theory without integrity is ultimately bankrupt. This book contains a series of essays analyzing Ken Wilber's views on evolution and intelligent design.

The Emergent Christ Ilia Delio, 2011 Ilia Delio makes a fascinating sense of the universe beginning with the story of cosmic evolution coursing through the meaning of God in evolution and the emergence of Christ and concluding with new ways of seeing Christ in all things. As Teilhard de Chardin did in *The Divine Milieu* Ilia Delio reveals the sacrament of God at work in the world. She also explores the spiritual evolution within each of us and suggests that it will change the cosmos as well as the church. She shows that we are at a stage in evolution where our choices will determine what happens next. Love, she writes, always seeks the best for the beloved but God is a beggar of love who waits at the soul's door without daring to force it open. The question of Christ emerging as the personal center of the universe is not a question of yes or no but a question of how that love will evolve. She makes one thing perfectly clear: it is happening and the evidence is astounding. *The Emergent Christ* is an antidote to the new atheism that says there is no place in evolution for God, let alone a God of love. It is also a spiritual tonic for Christians interested in understanding their place and purpose in this evolving universe.

Ken Wilber in Dialogue Donald Jay Rothberg, Sean M. Kelly, Sean Kelly, 1998-02-01 A passionate conversation among the best minds in transpersonal studies about the ideas of Ken Wilber, the prominent contemporary thinker whose first book *The Spectrum of Consciousness* published by Quest in 1977 launched the transpersonal psychology movement. Transpersonal thinkers taking part in this dynamic dialogue combine Eastern and Western spirituality with mainstream fields such as psychology, medicine, physics, and ecology to map the human drive toward Spirit. Contributors include best-selling authors Jack Kornfield, *A Path with Heart*; Joseph Goldstein, *Insight*
