 for fact and public policy is based on objective reality asks Neil deGrasse Tyson science popularizer and author of *Astrophysics
 for People in a Hurry* I don't know for sure But a good place to start would be for everyone on earth to read this book Maybe
 you know someone who swears by the reliability of psychics or who is in regular contact with angels Or perhaps you're trying
 to find a nice way of dissuading someone from wasting money on a homeopathy cure Or you met someone at a party who
 insisted the Holocaust never happened or that no one ever walked on the moon How do you find a gently persuasive way of
 steering people away from unfounded beliefs bogus cures conspiracy theories and the like This down to earth entertaining
 exploration of commonly held extraordinary claims will help you set the record straight The author a veteran journalist has
 not only surveyed a vast body of literature but has also interviewed leading scientists explored the most haunted house in
 America frolicked in the inviting waters of the Bermuda Triangle and even talked to a contrite Roswell alien He is not out
 simply to debunk unfounded beliefs Wherever possible he presents alternative scientific explanations which in most cases are
 even more fascinating than the wildest speculation For example stories about UFOs and alien abductions lack good evidence
 but science gives us plenty of reasons to keep exploring outer space for evidence that life exists elsewhere in the vast
