Counselling Skills For Dietitians Counselling Skills For Dietitians:

Counselling Skills for Dietitians Judy Gable, 2008-04-15 Dietitians need to use advanced communication skills as well as technical expertise in order to assess clients' needs, identify their problems and help them to manage their diet and lifestyle. The ability to develop a helping relationship is fundamental to achieving a mutually satisfactory dietetic interview. Counselling skills defined as advanced communication skills used intentionally in a helping relationship are therefore essential for good dietetic practice at all levels of the profession. This book demonstrates how a practitioner can develop a counselling approach and employ appropriate counselling skills to overcome the communication difficulties encountered by dietitians and those engaged in helping clients change their eating behaviour. New material in the second edition includes an expanded section on the patient interview including assessing motivation and applying aspects of CBT cognitive behavioural therapy and a new section on personal development including examples and discussion on issues of interprofessional communication and working in a multidisciplinary team.

Counselling Skills for Dietitians Judy Gable, Tamara Herrmann, 2015-12-22 The third edition *Counselling Skills for Dietitians* has been fully revised and updated to reflect the recent developments, research and interests in the field. It explores the skills required for dietetic counselling and includes frequent examples of dialogue from patient consultations as well as exercises and activities so that the reader can undergo experiential learning relevant to their practice. Includes examples from daily practice to illustrate the difficulties encountered by dietitians and demonstrate the application of counselling skills. Clearly explains theoretical models of accepted counselling practice underpinning the skills described. Has been updated to include additional information on topics such as assertiveness skills and eating distress. Addresses practical and psychological issues faced by dietitians and patients. Includes the latest research evidence for counselling skills in dietetic practice. Draws upon research evidence, theory and experience from the fields of psychotherapy and counselling. Now provides access to a range of supportive online material including videos of consultations, case studies and resources for trainers.

Nutrition Counseling and Education Skills for Dietetics Professionals Betsy Holli, 2012-12-17 The text covers communications, counseling, interviewing, motivating clients, delivering oral presentations and using media in presentations. Communication is basic to the relationship that the Registered Dietitian (RD) professional has with their clients. The Academy of Nutrition and Dietetics recognizes the importance of communication skills for practitioners to promote health, disease prevention and treatment. Providing people with information on what to eat is not enough; the RD must also promote and facilitate behavior changes to more healthful food choices. The text incorporates the Nutrition Care Process (NCP) and model including four steps: nutrition assessment, nutrition diagnosis, using PES statement, Problem, Etiology and Signs/Symptoms, nutrition intervention and nutrition monitoring and evaluation. The PES statements are the most critical in that the Academy of Nutrition and Dietetics has been stressing this as an essential component of their standards and requirements. The text uses activities, case studies, self-assessment questions, web
