Disease Life-Writing Martina Zimmermann, 2017-06-07 This book is open access under a CC BY 4.0 license This is the first book length exploration of the thoughts and experiences expressed by dementia patients in published narratives over the last thirty years It contrasts third person caregiver and first person patient accounts from different languages and a range of media focusing on the poetical and political questions these narratives raise what images do narrators appropriate what narrative plot do they adapt and how do they draw on established strategies of life writing It also analyses how these accounts engage with the culturally dominant Alzheimer's narrative that centres on dependence and vulnerability and addresses how they relate to discourses of gender and aging Linking literary scholarship to the medico scientific understanding of dementia as a neurodegenerative condition this book argues that first patients articulations must be made central to dementia discourse and second committed alleviation of caregiver burden through social support systems and altered healthcare policies requires significantly altered views about aging dementia and Alzheimer's patients

Alzheimer's Disease Memoirs Pramod K Nayar, 2021-12-06 This book examines writings by people living with Alzheimer's Disease and their caregivers Its focus areas include the construction of the self in the face of diminishing linguistic and cognitive abilities the stigmatization of ageing the various narrative strategies that these texts often collaboratively employ the health activism and advocacy generated via a biosociality and the ethics of care It examines the disease writing genre about a condition that ravages the ability to use language It serves as a literary examination of the work done in this area through a critical reading of the memoirs of those with AD and caregivers and a healthy dose of literary theory The book is a valuable resource for those interested in literary and critical theory and researchers in the field of ageing dementia studies The Diseased Brain and the Failing Mind Martina Zimmermann, 2020-06-25 This book is available as open access through the Bloomsbury Open programme and is available on www.bloomsburycollections.com It is funded by The Wellcome Trust The Diseased Brain and the Failing Mind charts changing cultural understandings of dementia and Alzheimer's disease in scientific and cultural texts across the 20th Century Reading a range of texts from the US UK Europe and Japan the book examines how the language of dementia regarding the loss of identity loss of agency loss of self and life is rooted in scientific discourse and expressed in popular and literary texts Following changing scientific understandings of dementia the book also

demonstrates how cultural expressions of the experience and dementia have fed back into the way medical institutions have treated dementia patients The book includes a glossary of scientific terms for non specialist readers *Thinking About Dementia* Annette Leibing, Lawrence Cohen, 2006-02-15 Cultural responses to most illnesses differ dementia is no exception These responses together with a society's attitudes toward its elderly population affect the frequency of dementia related diagnoses and the nature of treatment Bringing together essays by nineteen respected scholars this unique volume approaches the subject from a variety of angles exploring the historical psychological and philosophical implications of dementia Based on solid ethnographic fieldwork the essays employ a cross cultural perspective and focus on questions of age mind voice self loss temporality memory and affect Taken together the essays make four important and interrelated contributions to our understanding of the mental status of the elderly First cross cultural data show the extent to which the aging process while biologically influenced is also very much culturally constructed Second detailed ethnographic reports raise questions about the behavioral criteria used by health care professionals and laymen for defining the elderly as demented Third case studies show how a diagnosis affects a patient's treatment in both clinical and familial settings Finally the collection highlights the gap that separates current biological understandings of aging from its cultural meanings As Alzheimer's disease and other forms of dementia continue to command an ever increasing amount of attention in medicine and psychology this book will be essential reading for anthropologists social scientists and health care professionals
