

[illegible][illegible]

Definition	Any human-made, artificial structure that is used to store water
Structure	• Dams are built across rivers or streams • They create a barrier that stops water from flowing freely • The water behind the dam is called reservoir or impoundment
Purpose	• To generate hydroelectric power • To provide water for irrigation • To provide water for drinking and other uses • To provide flood control
Types of Dams	• Gravity Dam: A dam that relies on its own weight to hold back water • Arch Dam: A dam that has a curved shape, which allows it to transfer the force of the water to the abutments • Buttress Dam: A dam that has a series of vertical supports, which allow it to transfer the force of the water to the abutments • Embankment Dam: A dam that is built with earth and rock • Concrete Dam: A dam that is built with concrete
Advantages	• They provide a reliable source of water • They provide a source of hydroelectric power • They provide water for irrigation • They provide water for drinking and other uses • They provide flood control
Disadvantages	• They are expensive to build • They can be dangerous if they fail • They can cause environmental problems • They can cause social problems
Conclusion	Dams are a complex and controversial structure that have been used for centuries. They provide a variety of benefits, but they also have some drawbacks. It is important to weigh the pros and cons of dams before deciding whether or not to build one.
