have not seen any breakthroughs in methodology or technologies in the past 10 years CCSA and CGAP are single part specialty exams If you have strong background in internal auditing you will find these exams relatively easy Note that we are dealing with the International Professional Practices Framework IPPF which is the conceptual framework that organizes authoritative guidance promulgated by the IIA You just need to memorize it The entire content can be viewed online via the official location <http://www.theiia.org> guidance standards and guidance Do note that many of the CIA CCSA CGAP knowledge areas are overlapped even though they are differently labeled My suggestion is that you go through ALL TOPICS before taking any of the individual exam modules Do NOT study on a per module basis Instead treat all of them as a whole this will guarantee that you don't get tripped up when similar questions show up on different exam parts And know the IPPF inside and out Many correct answers come out from the IPPF
