

CD 25-260

Competitive investment & superb reliability

1. Reliable operation

Designed to perform reliably at continuous operation at 100% airflow, whereas most dryers on the market are only built to work at 70% to 80%. This includes a constant pressure drop of 10-12/5.9" or 40-12/40.9" as standard. The pressure drop can also be adjusted for increased or application changes.

2. Unique manifold/valve design

- Large port diameter minimizes pressure drop for advanced energy savings.
- Electronically operated 3/2 valve reduces risk of breakdowns and offers reliable control during airflow fluctuations. With this new design, manual switching operates reliably even in rough conditions.
- Service openings ensure easy service of the moving parts of the valve system.
- Clean streamer design minimizes pressure drop, regeneration times and energy consumption. Its "swirl" technology ensures optimal distribution of the airflow and decreases risk of the blowout.

3. Service and maintenance-friendly

- Decoupler bags allow for quick replacement without spilling adsorbent material.
- A spring covers the bags to prevent damage by decoupler moving due to pressure pulsations.

4. Attached filters

- A durable 10 µm filter prevents oil contamination to protect desiccant filters and is included for installation in the air piping.
- A 0.5 µm after filter protects the stream from desiccant dust and network contamination and is included for installation in the air piping.
- To be installed in the air piping.
- Easy to assemble and maintain.

5. Flexible purge set

Offers flexibility in optimizing regeneration pressure for lowest purge air consumption. Standard in 7 bar, 4 and 10 bar models come as separate parts.

6. Advanced options

- Pressure drop sensor required for Dependent Switching.
- Wall mounting kit.

7. Advanced control and monitoring system

- A line display in 13 languages.
- Service alarm and general alarm relay.
- Monitor all parameters to ensure maximum reliability.
- Allow for synchronization with the compressor, turning on/off when the compressor starts.
- Service indicators (4,000, 6,000 and 80,000 hours and warnings).
- Optional pressure drop sensor for Dependent Switching.

CD 1-22

The compact solution

1. High-quality components designed for low pressure drop and increased reliability provide reliable operation.
2. Filled with high-performance molecular sieves to allow for various pressure drops (10-12/40.9" and 15-12/100.9"). Certified cartridges protect against desiccant aging and moisture peaks. Integrated after filters ensure fast and cheap maintenance.
3. Multistep inlet and outlet provide easy connection to the air system. The dryer can be installed vertically or horizontally.
4. Integrated electronic moisture sensor.
5. Full electronic controller with gauge panel location. The sophisticated electrical panel is PPS-protected against water and dust.

Features and benefits

Enduring performance

- Flow return valves and purge valves are built into the submicron cartridges.
- Each desiccant cartridge includes an integrated after filter to save space, simplify installation and increase the risk of leaks.
- The dryer can perform in working pressures up to 16 barg (232 psi) and temperatures up to 50 °C (122 °F).

Energy efficiency and savings

- Low pressure drop across the whole range.
- Purge save function is included as standard.
- Adjustable purge, available as an option, matches purge air consumption to the actual working conditions.

Easy operation

- Controller shows the drypoint status and automatic fault diagnosis.
- No need to disconnect the dryer from the compressed air network for servicing.
- The inlet and outlet can be reversed. The dryer can be reversed manually.
