Cyborg Citizen Chris Hables Gray, 2001-01-01 The growing synergy of humans and technology from dialysis to genetically altered foods to PET scans is transforming how we view our minds and our bodies But how has it changed the body politic How can we forge a society that protects the rights of human and cyborg alike The creator of the cult classic *Cyborg Handbook* Chris Hables Gray now offers the first guide to posthuman politics framing the key issues that could threaten or brighten our technological future For good or ill politics has already been cyborged in ways that touch us all On line voting promises to change who participates Wars are won on video screens Biotechnological advances cloning sexual prostheses gene patents are redefining life death and family in ways that strain the social contract In the face of these advances visions of the cyborg future range from the utopian to the nightmarish from a spiritual super race transcending the body's confines to a soulless Borg consuming human individuality Only with a broad historically rich and ethically grounded understanding of these issues Gray argues can we combat the threats to our freedom and even our survival A work of vision and imagination *Cyborg Citizen* lays the groundwork for the participatory evolution of our society

Citizen Cyborg James Hughes, 2004-10-27 A provocative work by medical ethicist James Hughes *Citizen Cyborg* argues that technologies pushing the boundaries of humanness can radically improve our quality of life if they are controlled democratically Hughes challenges both the technophobia of Leon Kass and Francis Fukuyama and the unchecked enthusiasm of others for limitless human enhancement He argues instead for a third way democratic transhumanism by asking the question destined to become a fundamental issue of the twenty first century How can we use new cybernetic and biomedical technologies to make life better for everyone These technologies hold great promise but they also pose profound challenges to our health our culture and our liberal democratic political system By allowing humans to become more than human posthuman or transhuman the new technologies will require new

answers for the enduring issues of liberty and the common good What limits should we place on the freedom of people to control their own bodies Who should own genes and other living things Which technologies should be mandatory which voluntary and which forbidden For answers to these challenges Citizen Cyborg proposes a radical return to a faith in the resilience of our democratic institutions *The Politics and Ethics of Transhumanism* Alexander Thomas,2024-07-30
