Cycles Crises And Innovation Path To Sustainable Development A Kaleckian Schumpeterian Synthesis:

Cycles, Crises, Innovation Jerry Courvisanos, 2012-05-01 Reflection on the history of opinion and its application to our contemporary world and controversies over technology and our environmental difficulties is the distinguishing feature of the thoughtful economist. If the reader of this book is moved to reflect on the work of Schumpeter and Kalecki the author of this book will have succeeded. Even more important than this is if the reader of this book comes to a changed and deeper understanding of how technology changes in our faltering capitalist economies and of how the environment is affected by production and may be improved with better ways of satisfying our personal and productive needs then the author will have done an even greater service to his profession and humanity. From the foreword by Jan Toporowski School of Oriental and African Studies University of London UK Jerry Courvisanos provides us with a timely analysis of the forces behind the crises of capitalism and the tendency towards ecologically unsustainable growth. He draws on the work of two of the most creative if not most recognized economists of the 20th Century Michal Kalecki and Joseph Schumpeter. In place of mainstream analysis with its emphasis on marginal conditions for optimisation around well defined equilibrium we have a world of innovation structural change creative destruction business cycles financial crises changing income distribution and many other inconvenient developments that plague modern economies. From the foreword by Harry Bloch Curtin University Australia Cycles crises and innovation are the major economic forces that shape capitalist economies. Using a critical realist political economy approach the analysis in this fine work is based on the works of Micha Kalecki and Joseph Schumpeter both of whom identify these three dynamic forces as plotting the path of economic development. Jerry Courvisanos thought provoking book examines how the rise of capital through investment enshrines innovation in profit and power which in turn determines the course of cycles and crises. The author concludes by arguing for strategic intervention by transformative eco innovation as a public policy path to ecologically sustainable development. This interdisciplinary book will appeal to economists innovation and entrepreneurship based scholars postgraduate students studying the political economy of both innovation and entrepreneurship regional development planners and economic development policymakers. Anyone with a general interest in economics politics and innovation or looking for a path out of the economic and ecological morass of current capitalism will also find much to interest them in this book.

Realizing an Alternative Political Economy of Sustainability Arturo Hermann, 2025-07-25 Engagement with and between a plurality of progressive non neoclassical traditions is an important step in fostering a more capacious understanding of sustainability both as a concept and as a political objective. To that end this book provides a critical overview of the development of alternative perspectives on the economics of sustainability highlighting the presence of various strands of heterodox economics and radical ecology and arguing that greater engagement between these schools of thought is required to help formulate viable alternatives to the prevailing neoliberal ideology. The chapters in Part I of this volume Ecofeminism Social Ecological Economics Bioeconomics Steady State present a

series of concrete policy proposals for building socially just sustainable socio economic processes Each chapter utilizes the acumen of a given heterodox tradition to formulate policy reforms to secure this objective In Part II Heterodox Macroeconomics and Sustainability the contributors make the case for more radical forms of socio economic transformation particularly emphasizing community local and regional level initiatives for change The final part Circular Economy Civil Economy and Other Heterodox Contributions reflects on the potential strategic political economic contribution of heterodox economics to building more sustainable and just socio economic practices in a broader sense These chapters demonstrate that heterodox economics and radical ecology can productively contribute to realizing sustainability in areas such as economic pedagogy through working in conjunction with other social justice movements and by challenging extant neoliberal ideologies of sustainability They also deliberate on some of the institutional and epistemological challenges that confront heterodox practitioners seeking to make such an impact This volume is essential reading for anyone concerned with a viable alternative conception of the economy and sustainability including readers from all schools of heterodox economics and radical ecology and people and organizations involved in various ways in building an alternative political economy of sustainability

Handbook on Regional Economic Resilience Gillian Bristow, Adrian Healy, 2020-02-28 This Handbook provides a collection of high quality contributions on the state of the art in current debates around the concept of regional economic resilience It provides critical contributions from leading authors in the field and captures both key theoretical debates around the meaning of resilience its conceptual framing and utility as well as empirical interrogation of its key determinants in different international contexts

The Myths of Regional Innovation Rider W. Foley, 2025-08-08 Billions of dollars Euros yen and yuan in public funds are spent annually to promote innovation in metropolitan regions attempting to transform the economy by attracting technology based companies and supporting small startups to secure high paying jobs The impacts of those investments are typically assessed in terms of economic growth venture capital and jobs Regional innovation is assessed with financial measures that do not account for the distribution of wealth nor do they evaluate if innovation addresses broader sustainability concerns This book draws on evidence from 144 interviews with civic leaders in three urban regions Atlanta Phoenix and the Twin Cities to illuminate three commonly accepted but flawed myths about innovation that misdirect policymakers and civic leaders and perpetuate the idea that innovation is solely about economic growth This book offers evidence of the social networks labor divisions and conditions enabling innovation to dispel those three myths and propose more nuanced and realistic ways of thinking about regional innovation This book is not an argument against innovation Rather it critically reflects upon investments in innovation and showcases laudable efforts to create a livable and sustainable city The book offers a novel method to assess the processes and outcomes of innovation in a manner that can complement economic approaches The author lays bare the human values that motivate city staff corporate officers and academic partners and highlights the efforts of organizations that often remain underappreciated The evidence

presented in this book puts forward a means to assess if and how innovation contributes to an equitable and sustainable future or if it perpetuates injustices and economic stratification The Myths of Regional Innovation will appeal to scholars across broad fields including innovation studies technology management entrepreneurship economic development and public policy

Science, technology and innovation policies for inclusive growth in Africa : human skills development and country cases LIT Verlag,2020-01-01 The volume analyses major strategic and policy issues How to make Science Technology and Innovation STI Policies relevant for inclusive growth strategies in Africa so that socio economic transformation strategies will take off The first part discusses the issues of human skills development as part of STI policies based on visions strategic plans and country cases for Cameroon Nigeria and Mauritania The second part looks at STI Policies for Economic Transformation focussing on country case studies for Egypt and Tunisia A third part presents book reviews and book notes
