The International System for Serous Fluid Cytopathology Ashish Chandra, Barbara Crothers, Daniel Kurtycz, Fernando Schmitt, 2020-11-05 This book is the culmination of an international effort to bring

consistency and diagnostic efficiency to effusion cytology for the sake of patient care The authors recognize special challenges in serous fluid cytopathology such as reporting the presence of Mullerian epithelium in peritoneal fluids What is an appropriate serous fluid volume to ensure adequacy How should mesothelial proliferations be reported and is it appropriate to make an interpretation of malignant mesothelioma How specific should a report be regarding the origin and subtyping of tumors found in serous fluids What are the appropriate quality monitors for this specimen type Special chapters on considerations for peritoneal washings cytopreparatory techniques mesothelioma and quality management are included to address these issues The text contains literature reviews that elucidate existing evidence in support of current practices and recommendations Expert opinions on where evidence was lacking the most common practices were adopted by consensus and where there was no commonality are employed Written by experts in the field The International System for Serous Fluid Cytopathology serves as a collaborative effort between the International Academy of Cytology and the American Society for Cytopathology and calls upon participation of the international cytopathology and oncology communities to contribute to the development of a truly international system for reporting serous fluid cytology

Diagnostic Cytopathology Winifred Gray, Gabrijela Kocjan, 2010-01-01 The new edition of Diagnostic Cytopathology provides the practicing and trainee cytopathologist with a comprehensive guide to the diagnostic applications of exfoliative and aspiration cytology The book covers normal and abnormal cytological findings encountered in all body sites where cytological applications are used Appropriate histopathological immunohistochemical and molecular correlations together with a consideration of the possible differential diagnoses accompany the cytological findings The reader can see a full range of normal and abnormal findings with almost 2 000 full colour images The book is heavily referenced to ensure that it will serve as a practical resource for daily reference in the laboratory A uniformity of basic chapter structure will help readers to quickly find the diagnostic answers they seek This edition stresses not just the diagnostic cytological features of the various conditions encountered but also the diagnostic pitfalls and the grey areas between so as to enable the reader to give more evidence based reports In recognition of their rapid expansion there are new chapters on recent technological developments and on the cytodiagnosis of childhood tumours A special section on the importance of multidisciplinary team meetings that include the cytopathologist as a core member of the team has also been included at the end of each chapter As active members of this team cytopathologists can define their role in the management pathway and thus bring the patient and the microscope together as never before The full text can be accessed online and images downloaded via Expert Consult
