

The background is a deep blue with a large, dark sphere in the center. A bright, glowing beam of light descends from a small, bright sphere at the top, passing through the center of the large sphere. The beam is surrounded by a vibrant, multi-colored aura that transitions from yellow at the top to orange and red at the bottom. The overall effect is ethereal and spiritual.

Pierre Teilhard de Chardin and Carl Gustav Jung: Side by Side Fred Gustafson, 2015-03-21 Pierre Teilhard de Chardin and C G Jung Side by Side is an anthology written by authors from different backgrounds sharing how the lives of Pierre Teilhard de Chardin and Carl Gustav Jung impacted them personally and or how they understand the relevance of these two men for our present times Contributors to this fourth volume of the Fisher King Review include John Dourley Peter Dunlap Barbara Faris Fred R Gustafson John Giannini Richard W Hanhardt Robert Henderson Steven B Herrmann Jane A Kelley Jon Magnuson Francisco Paco Martorell Stan V McDaniel Dennis L Merritt and Laura A Weber Though C G Jung and Pierre Teilhard de Chardin never met their independent intellectual inquiries and courageous researches pushed the personal and collective soul forward and placed both of them at the foreground of needing to understand and integrate on a planetary level the core values of their expansive work Both Jung and de Chardin were concerned with science and religion and operated within these paradigms Both of them shook the world by offering up views on one hand of the profound depths of the human psyche and on the other presenting a profound re consideration of evolution as a process leading toward a social unification of the planet One used the concept of individuation the other spoke of evolution Each took these concepts to a creative depth so much so that the world they lived in either deeply admired or detested them Both had conflicts in their chosen fields Jung was a psychologist who used the field of science to explore the religious depths of the human soul by studying mythology world religions folk tales dreams and human behavior Chardin used the ground of religion to work in the field of science via paleontology geology and physics as he explored a deeper and relevant understanding of evolution Though each began from different intellectual platforms they each

crisscrossed into the other's territory of inquiry and related their ideas to include the full scope of humanity. One went deeply into soul and found matter whereas the other went deeply into matter and found soul. In their own ways both spent their careers trying to heal the split between spirit and matter in the *weltanschauung* of their times reflected in the human psyche and in the general religious views permeating most of Western culture.

The Dream: The Vision of the Night Max Zeller, 2015-06-01 A classic in the field of dream analysis. *The Dream: The Vision of the Night* is a collection of essays, lectures, and vignettes by Max Zeller whose career included a law degree, a brief imprisonment in a Nazi Concentration Camp, study at the Jung Institute in Zurich, Switzerland, and thirty years of in-depth work as a Jungian analyst. In the eighteen pieces of this collection, Zeller intersperses theoretical writings, compassionate and incisive case studies, and powerful, almost haiku-like reminiscences of certain incidences in his life, from his meetings with C. G. Jung to his impressions of life in pre-war Nazi Germany. *The Dream: The Vision of the Night* is the best example of amplification of Jungian principles that can be found. Neither pure research nor pure memoir, the collection is an affective combination of both and, as such, best portrays the spirit of its author: always restless and searching, always compassionate and open-minded, and above all, always fascinated by the mystery and power of our dreams.

Field, Form, and Fate Michael Conforti, 2019-11-28 C. G. Jung emphasized the deep link to the physical world that exists for the collective unconscious and its archetypes. Our dreams and symbols, as well as the patterns of our behavior, are shaped by the fact that we are creatures of a material universe. Michael Conforti's research has been directed to understanding the nature of these links and patterns in the light of the new sciences: quantum theory, chaos theory, self-organization, and the new biology. Conforti's book successfully integrates this material to offer a new, exciting challenge to psychotherapy. It demonstrates that the study of consciousness cannot neglect the insights of the sciences, and in doing so, promises a unified view of mind and matter.

A Journalist's Education in the Classroom David S. Awbrey, 2010-12-16 After an impressive career in journalism David S Awbrey became a middle school social studies teacher in Springfield Missouri a typical American community that he uses as a compelling case study to explore many of the social and academic problems facing education nationwide A Journalist s Education in the Classroom is an insightful poignant and often humorous account of his experiences teaching medieval and Renaissance history What Awbrey found in the classroom should alarm all Americans students obsessed with popular culture and disengaged from academics teachers intellectually unprepared for the 21st century global society and an educational establishment focused more on protecting its own power than on ensuring that the next generation possesses the scholastic skills necessary to advance American democracy and prosperity But Awbrey offers hope Citing historical precedents including Charlemagne s lifting Europe out of the ignorance of post Roman Empire barbarism and the 15th century Italian Renaissance he examines how the rediscovery of classical learning preserved Western civilization and persuasively argues that America s future hinges on a similar restoration of the liberal arts to primacy in the nation s schools
