in Early Childhood Education and Care Margaret Kernan, Elly Singer, 2010-10-04 *Peer Relationships in Early Childhood Education and Care* brings together a wide range of perspectives and research locating young children's relationships in the context of socio-cultural theories and relational pedagogy. *Early Childhood Studies* Rod Parker-Rees, Caroline

Leeson, 2015-07-13 For students of Early Childhood Studies, questions are as important as answers. What is childhood? Is childhood the same in all cultures? How do children grow and develop? What space do we make for children in our society? How do adults approach risk and what does this mean for children? Can children's play be planned by adults? *Early Childhood Studies* tackles these questions and more. It explores the why, how and what of studying and working with young children and their families, considering how a range of theories can help us to identify useful questions. This is a comprehensive, up-to-date, challenging and accessible core text for the Early Childhood Studies course. Throughout, key theories and research findings are highlighted and explored to help link theory and practice. It covers the important themes of child development, communication, wellbeing, observation, working with parents, inclusive practice, leadership and research. This fourth edition has been fully updated throughout and includes new chapters on children and risk, inclusive learning environments, play and adults' concepts of childhood. *Lifespan Development* Michele Hoffnung, Robert J. Hoffnung, Kelvin L. Seifert, Alison

Hine, Lynn Ward, Cat Pause, Karen Swabey, Karen Yates, Rosanne Burton Smith, 2015-09-28 *Lifespan Development* Third Australasian edition explores human physical, cognitive and social development within an Australian and New Zealand context. Building on the successful first and second editions, the resource's comprehensive theory coverage includes the latest local and international research in this ever-evolving field and is perfectly complemented by numerous physical and mental health applications within local psychological, allied health and educational settings. This edition includes enhanced coverage of developmental theories and increased integrated coverage of cross-cultural and Indigenous issues unique to the multicultural societies of Australia and New Zealand. It is an ideal resource offering for undergraduate students in both countries in order to enhance understanding of human development from conception through to the end of life. **Teaching**
