Darkness In El Dorado How Scientists And Journalists Devastated The Amazon:

Darkness in El Dorado Patrick Tierney, 2001 What Guns Germs and Steel did for colonial history this book will do for modern anthropology telling the explosive story of how ruthless journalists self serving anthropologists and obsessed scientists placed the Yanomami one of the Amazon basin s oldest tribes on the cusp of extinction A New York Times Notable Book of photos **The Science of Good and Evil** Michael Shermer, 2025-09-23 From bestselling author Michael Shermer an investigation of the evolution of morality that is a paragon of popularized science and philosophy The Sun Baltimore A century and a half after Darwin first proposed an evolutionary ethics science has begun to tackle the roots of morality Just as evolutionary biologists study why we are hungry to motivate us to eat or why sex is enjoyable to motivate us to procreate they are now searching for the very nature of humanity In The Science of Good and Evil science historian Michael Shermer explores how humans evolved from social primates to moral primates how and why morality motivates the human animal and how the foundation of moral principles can be built upon empirical evidence Along the way he explains the implications of scientific findings for fate and free will the existence of pure good and pure evil and the development of early moral sentiments among the first humans As he closes the divide between science and morality Shermer draws on stories from the Yanomami famously known as the fierce people of the tropical rain forest to the Stanford studies on jailers behavior in prisons The Science of Good and Evil is ultimately a profound look at the moral animal belief and the scientific pursuit of truth *Partitioned Lives* Anjali Gera Roy, Nandi Bhatia, 2008 Contributed articles chiefly with reference to India *The Ethics of Anthropology* Pat Caplan, 2004-03-01 Since the inception of their discipline anthropologists have studied virtually every conceivable aspect of other peoples morality religion social control sin virtue evil duty purity and pollution But what of the examination of anthropology itself and of its agendas epistemes theories and praxes In 1991 Raymond Firth spoke of social anthropology as an essentially moral discipline Is such a view outmoded in a postmodern era Do anthropological ethics have to be re thought each generation as the conditions of the discipline change and as choices collide with moral alternatives The Ethics of Anthropology looks at some of these crucial issues as they reflect on researcher relations privacy authority secrecy and ownership of knowledge The book combines theoretical papers and case studies from eminent scholars including Lisette Josephides Steven Nugent Marilyn Silverman Andrew Spiegel and Veronica Strang Showing how the topic of ethics goes to the heart of anthropology it raises the controversial question of why and for whom the anthropological discipline functions Cultural Heritage and Human Rights Helaine Silverman, D. Fairchild Ruggles, 2008-10-14 Is there a universal right to the free expression and preservation of cultural heritage and if so where is that right articulated and how can it be protected No corner of today s world has escaped the effects of globalization for better or worse This volume addresses a deeply political aspect of heritage preservation and management as it relates to human rights *Lost Paradises and the Ethics of Research and Publication* Institute of Biosciences Federal University of Rio Grande do Sul Francisco M.

Salzano Department of Genetics, Department of Anthropology University of New Mexico A. Magdalena Hurtado Associate Professor, 2003-11-20 In 2000 the world of anthropology was rocked by a high profile debate over the fieldwork performed by two prominent anthropologists Napoleon Chagnon and James V Neel among the Yanomamo tribe of South America The controversy was fueled by the publication of Patrick Tierney's incendiary *Darkness in El Dorado* which accused Chagnon of not only misinterpreting but actually inciting some of the violence he perceived among these fierce people Tierney also pointed the finger at Neel as the unwitting agent of a deadly measles outbreak Attracting a firestorm of attention Tierney's book went straight to the heart of anthropology's most pressing questions What are the right ways to study a tribal people How can scientists avoid unduly influencing those among whom they live What guidelines should govern the interactions economic social medical and sexual between a scientist in the field and the people being studied This volume represents anthropology's thoughtful measured reply to the issues raised by this heated controversy Placing the dispute within the context of ongoing debates over the ethics of biomedical research among human populations the contributors to this volume discuss how the interaction between investigators and their subjects can most sensibly be governed They consider the responsibility of the media in disseminating anti scientific and pseudo scientific views and how scientists might best educate journalists to enable them to effectively educate others In the wake of what was widely construed as a major scientific scandal this landmark volume lays out in detail the principles and ground rules of anthropological and scientific fieldwork

Inventing the Thrifty Gene Travis Hay, 2021-09-10 Though First Nations communities in Canada have historically lacked access to clean water affordable food and equitable health care they have never lacked access to well funded scientists seeking to study them *Inventing the Thrifty Gene* examines the relationship between science and settler colonialism through the lens of Aboriginal diabetes and the thrifty gene hypothesis which posits that Indigenous peoples are genetically predisposed to type 2 diabetes and obesity due to their alleged hunter gatherer genes Hay's study begins with Charles Darwin's travels and his observations on the Indigenous peoples he encountered setting the imperial context for Canadian histories of medicine and colonialism It continues in the mid twentieth century with a look at nutritional experimentation during the long career of Percy Moore the medical director of Indian Affairs 1946-1965 Hay then turns to James Neel's invention of the thrifty gene hypothesis in 1962 and Robert Hegele's reinvention and application of the hypothesis to Sandy Lake First Nation in northern Ontario in the 1990s Finally Hay demonstrates the way in which settler colonial science was responded to and resisted by Indigenous leadership in Sandy Lake First Nation who used monies from the thrifty gene study to fund wellness programs in their community *Inventing the Thrifty Gene* exposes the exploitative nature of settler science with Indigenous subjects the flawed scientific theories stemming from faulty assumptions of Indigenous decline and disappearance as well as the severe inequities in Canadian health care that persist even today **The Handbook of Ethical Research with Ethnocultural Populations and Communities** Joseph E. Trimble, Celia B. Fisher, 2006 This

volume addresses challenges at methodological procedural and conceptual levels for the responsible conduct of research in the field Each chapter includes case examples to illustrate significant ethical principles Tropical Forests of the Guiana Shield D. S. Hammond,2005 The Guiana Shield is an ancient geological formation located in the northern part of South America covering an area of one million square kilometres Despite its hostile environment it is home to many unusual and highly specialized plants and animals which constitute a rich area of biodiversity Chapters in this book include hydrology nutrient cycling forest phenology insect plant interactions forest microclimate plant distributions forest dynamics and conservation and management of flora and fauna It provides a comprehensive and detailed review of the ecology biology and natural history of the forests of the area **The Amazonian “Other”** Aleksandra Wierucka,2024-08-07 This book explores representations of Amazonian Indigenous peoples in contemporary cultural texts It analyzes a variety of mediums from novels and films to games and exhibitions uncovering a distorted image of Indigenous peoples of the Amazon in Euro American common imagination The author suggests that these texts rely on a stereotypical vision that was shaped in the first decades of colonization The chapters consider the formation of the image of Amazonian Indigenous people throughout history and some of the contemporary issues they face touching on daily life and themes such as shamanism and cannibalism Together they highlight the misrepresented image of Indigenous groups in the Amazon who are portrayed as different even strange in relation to Western culture The argument put forward is that both exotic and self exoticization rely on the notion of otherness leading to romanticization patronization and caricature The book will be of particular interest to scholars of Indigenous studies Latin American studies cultural studies anthropology and comparative literature
