order to reveal the density of connections and exchanges that inform educational practices policies and systems It attaches
particular importance to individual and collective actors that govern these flows initiating promoting or reconfiguring
transfers of policy models The contributors explore various aspects of the circulatory mechanisms that have been deployed in
the field of education during the modern and contemporary period Varying the observation scales from local to international
they demonstrate the multilateral character of the circulatory dynamics observed The implementation of rich and varied
approaches to these complex processes offers a perspective that complements and renews our knowledge of the genesis and
evolution of educational policies and systems most notably highlighting their foreign inspirations However these studies do
not merely evoke borrowings and hybridization as if national borders proved porous or non-existent Instead they show that
the phenomena of resistance reinterpretation and rejection are also an integral part of transnational mechanisms of
exchanges The book thus demonstrates the relevance of a historical approach in addressing these transnational mechanisms
