Cordelia: Parental Love and Parental-State Theft in Los Angeles Juvenile Dependency Court Simon

Cambridge, 2019-09-17 Climbing the Broken Judicial Ladder continues the author's journey of exploring the heartbreak and loss of first adopting Cordelia with severe reactive attachment disorder RAD in Washington state and then of nearly losing her to the draconian and confused child welfare legal complex in Los Angeles In this third volume of his Denied Failing Cordelia trilogy Cambridge climbs the broken California judicial ladder from the California Court of Appeals Second Appellate District based in Los Angeles to the California Supreme Court Cambridge concludes that in appeals relating to dependency cases the ladder is broken for parents seeking to advocate for themselves and for the true best interests of their children Policies relating to child welfare are flawed Cambridge argues because of the preemptive and prejudicial response to the issues raised during the detention of children As with his two earlier books Cambridge explores issues connected with how best to parent his adopted daughter and advocate for her needs in the context of a dependency case Cordelia's reactive attachment disorder would surface throughout the judicial struggle as would the author's own struggles with Asperger syndrome Each would feed negatively into the overall trauma and drama of the author's unrelenting quest to reunite his forever family Cambridge believes that dependency proceedings are ill equipped on many levels to elicit a proper understanding of RAD or of the therapeutic parenting needed to address it Cambridge believes that adoptive parents of children with special needs need to be understood by more sympathetic social workers and by therapists trained in attachment disorders Cambridge's persistent efforts to reunite his forever family would leave him increasingly isolated as he climbs the judicial ladder Based on his experiences Cambridge explores areas for reform in Los Angeles dependency proceedings and evokes Shakespeare's King Lear by arguing that social workers need to see better and that the Los Angeles Juvenile Dependency Court needs to encourage a broader understanding of the issues raised through more effective legal advocacy from assigned dependency lawyers Cambridge argues that parents should be allowed to address the court directly Cambridge also relates how he and his daughter have found many positive and healthy ways to heal in the years since their dependency case ended Much trauma could have been avoided if those around them had seen better and had recognized the value in their dramatic and loving adoption journey **Posttraumatic Stress Disorder** Julian D Ford, Damion J. accordance with a higher rationality But both ancient philosophy and recent scientific scholarship emphasize implicit systems such as action schemas and perceptual filters that guide behavior and shape human development In this integrative book Darcia Narvaez argues that morality goes all the way down into our neurobiological and emotional development and that a person's moral architecture is largely established early on in life Moral rationality and virtue emerge bottom up from lived experience so it matters what that experience is Bringing together deep anthropological history ethical philosophy and contemporary neurobiological science she demonstrates where modern industrialized societies have fallen away from the cultural practices that made us human in the first place Neurobiology and the Development of Human Morality advances the field of developmental moral psychology in three key ways First it provides an evolutionary framework for early childhood experience grounded in developmental systems theory encompassing not only genes but a wide array of environmental and epigenetic factors Second it proposes a neurobiological basis for the development of moral sensibilities and cognition describing ethical functioning at multiple levels of complexity and context before turning to a theory of the emergence of wisdom Finally it embraces the sociocultural orientations of our ancestors and cousins in small band hunter gatherer societies the norm for 99% of human history for a re envisioning of moral life from the way we value and organize child raising to how we might frame a response to human made global ecological collapse Integrating the latest scholarship in clinical sciences and positive psychology Narvaez proposes a developmentally informed ecological and ethical sensibility as a way to self author and revise the ways we think about parenting and sociality The techniques she describes point towards an alternative vision of moral development and flourishing one that synthesizes traditional models of executive top down wisdom with primal wisdom built by multiple systems of biological and cultural influence from the ground up

Surviving Trauma: Healing the Child Within Christina Hoffert,2023-10-24 In Surviving Trauma Healing the Child Within the author takes readers on a deeply personal and courageous journey of self discovery and recovery The book opens with a raw and honest reflection on the hesitations and self doubt that often accompany the idea of sharing one's experiences of trauma mental health struggles and personal growth The author grapples with questions like Am I cured enough to tell people I have survived the traumas of my past and Will people label me a hypocrite or a phony The narrative unfolds as the author embarks on a profound exploration of their own struggles with PTSD major depression addiction eating disorders anxiety homelessness incarceration domestic violence and more These experiences have been learned the hard way through pain and suffering The author dispels the myth that there is a magic solution to life's problems and shares the realization that they will never be perfect nor will life be without

challenges The heart of this book lies in the belief that one's experiences and the lessons learned from them can be valuable to those who are currently battling their own demons The author discovers that their own journey while filled with pain and darkness can serve as a beacon of hope for others who have endured trauma and its aftermath Throughout the narrative the author provides insights and guidance for those who are struggling offering tools for healing and personal growth One of the central suggestions the author offers is journaling They emphasize its importance for several reasons Firstly it allows individuals to release overwhelming emotions and thoughts without concern for grammar or coherence Journaling serves as a safe space to express the myriad feelings and fears that may be consuming one's mind Additionally it provides a means of processing these emotions When revisiting journal entries later individuals can identify irrational thoughts and replace them with a more accurate perspective The act of journaling also serves as a way to track personal progress over time Readers are encouraged to go back and review earlier entries allowing them to see how their thinking has evolved and improved By doing this the author demonstrates how their own journals from previous years were much more negative and self-defeating illustrating the power of self-reflection and growth Lastly journaling can reveal patterns and triggers that may not have been consciously recognized The author shares a personal example of discovering that anxiety attacks correlated with the week before their menstrual cycle Such revelations can help readers better understand the factors that contribute to their emotional well-being Each chapter concludes with a healing journaling exercise providing readers with practical tools to aid in their own healing journey The author strongly encourages journaling as a daily practice or as a resource to turn to during moments of overwhelming depression or anxiety Through heartfelt and candid storytelling this book offers hope and inspiration to those grappling with trauma and mental health challenges reminding them that they are not alone in their struggles and that healing is possible
