The Global Turn Eve Darian-Smith, Philip C. McCarty, 2017-08-01 The ability to deploy interdisciplinary theoretical perspectives that speak to interconnected global dimensions is critical if one s work is to be relevant and applicable to the emerging global scale issues of our time The Global Turn is a guide for students and scholars across all areas of the social sciences and humanities who wish to embark on global studies research projects The authors demonstrate how the global can be studied from a local perspective and vice versa They show how global processes manifest at multiple levels transnational regional national and local all of which are interconnected and mutually constitutive This book takes readers through the steps of thinking like a global scholar in theoretical methodological and practical terms and it explains the implications of global perspectives for research design

Innovation in the Arts Jason C. White, 2022-08-01 This concise guide aims to increase what we understand by innovation in the arts and identify and support opportunities and strategies for the unique ways in which artists and arts administrators think about engage in and pursue successful innovation in their diverse creative practice Innovations in the Arts are often marginalised from a research perspective in part because of the lack of a sound and compelling theoretical framework to support and explain process distinctions from business and management innovation This book identifies three key concepts art innovation art movement innovation and audience experience innovation supported by formal theory for each concept presented and evidenced through case studies in art history In this way the book enables readers to identify explain and support their innovation efforts as visual literary and performing artists and arts administrators It also explores strategies for pursuing innovation in practice Drawing attention to the unique ways in which artists and arts administrators think about and engage in innovation this readable book will be an essential reading for students in all aspects of the creative and cultural industries and an essential guide to developing and promoting innovation in the arts for practitioners and researchers alike

The American Dream for Students of Color Gretchen Givens Generett, Amy M. Olson, 2021-03-24 In The American Dream for Students of Color the tenets of the American Dream as a merit narrative enacted in schools are examined to better understand how beliefs about talent hard work and perseverance support the status quo rather than critical analyze barriers to educational success for students of color and students from a poverty context Using narrative methodologies this book explores the connections and

consistencies within and between their personal narratives and the narratives of school youth and educators that work with them Based on analysis of these shared stories the authors argue for the importance of moving from individualized success stories that reify hard work and perseverance to collective communal stories that serve to break down myths of meritocracy critically examine inequities and move educational advocates forward in authentic audacious hopeful ways *Coercion and Wage Labour* Anamarija Batista, Viola Franziska Müller, Corinna Peres, 2023-12-07 *Coercion and Wage Labour* presents novel histories of people who experienced physical social political or cultural compulsion in the course of paid work Broad in scope the chapters examine diverse areas of work including textile production war industries civil service and domestic labour in contexts from the Middle Ages to the present day They demonstrate that wages have consistently shaped working people's experiences and failed to protect workers from coercion Instead wages emerge as versatile tools to bind control and exploit workers Remuneration mirrors the distribution of power in labour relations often separating employers physically and emotionally from their employees and disguising coercion The book makes historical narratives accessible for interdisciplinary audiences Most chapters are preceded by illustrations by artists invited to visually conceptualise the book's key messages and to emphasise the presence of the body and landscape in the realm of work In turn the chapter texts reflect back on the artworks creating an intense intermedial dialogue that offers mutually relational translations and narrations of labour coercion Other contributions written by art scholars discuss how coercion in remunerated labour is constructed and reflected in artistic practice The collection serves as an innovative and creative tool for teaching and raises awareness that narrating history is always contingent on the medium chosen and its inherent constraints and possibilities Praise for *Coercion and Wage Labour* *Coercion and Wage Labour* is a pioneering volume It makes a well founded break with the widespread misconception that wage labour is by definition free from coercion The fourteen historical case studies lead to the conclusion that wage labourers too were subject to many forms of coercion and that usually their freedom was and is only relative But something else makes this book special throughout the text there are artistic illustrations that enter into a dialogue with the individual chapters which in turn reflect on the images This creates an inspiring interaction that complements the volume's interdisciplinary nature Marcel van der Linden International Institute of Social History Amsterdam *Research Methods for Political Science* David E. McNabb, 2020-12-30 The third edition of *Research Methods for Political Science* retains its effective approach to helping students learn what to research why to research and how to research The text integrates both quantitative and qualitative approaches to research in one volume and covers such important topics as research design specifying research problems designing questionnaires and writing questions designing and carrying out qualitative research and analyzing both quantitative and qualitative research data Heavily illustrated classroom tested exceptionally readable and engaging the text presents statistical methods in a conversational tone to help students surmount math phobia Updates to this new edition include Research topics chapters have been upgraded and

expanded Two mixed methods design chapters have been added A new chapter on hermeneutic analysis designs and research with large data sets The chapter on multivariate statistics has been expanded with an expanded discussion on logistic regression Tools on how to prepare and present research findings are now featured in the appendix allowing instructors more flexibility when teaching their courses Research Methods for Political Science will give students the confidence and knowledge they need to understand the methods and basics skills for data collection presentation and analysis
