J. Billington, S. P. Barnshaw, K. T. Bright, A. Crooks, 2017-03-10 Since publication of the first edition in 1976 The Building Regulations Explained and Illustrated has provided a detailed authoritative highly illustrated and accessible guide to the regulations that must be adhered to when constructing altering or extending a building in England and Wales This latest edition has been fully revised throughout Much of the content has been completely rewritten to cover the substantial changes to the Regulations since publication of the 13th edition to ensure it continues to provide the detailed guidance needed by all those concerned with building work including architects building control officers Approved Inspectors Competent Persons building surveyors engineers contractors and students in the relevant disciplines The Colour, Light and Contrast Manual Keith Bright, Geoffrey Cook, 2010-01-06 Endorsed by the Society of Light and Lighting this practical book offers comprehensive guidance on how colour light and contrast can be incorporated within buildings to enhance their usability The book provides state of the art clear guidance as well as a valuable information source for busy professionals involved in the design or management of new and existing environments The ways colour light and contrast are used within built environments are critical in determining how people interact with the space and how confident safe and secure they will feel when doing so They also have a major influence on a person s sense of well being and their ability to use the environment independently and without undue effort Understanding how to use colour and contrast and how they are influenced by both natural and artificial lighting is vital for all those involved in the design and management of the environments and spaces we all use In recent years there has been a considerable amount of work undertaken to further our

understanding of how colour light and contrast affect emotion and sensory abilities and how they can assist or hinder people in their everyday lives. Other publications consider these issues individually but *The Colour Light and Contrast Manual* designing and managing inclusive built environments draws knowledge and information together to produce a unique comprehensive and informative guide to how the three elements can work together to improve the design and management of environments for us all. The total energy consumption calculates for all buildings account for up to 40% in India and commercial and residential real estate combined will account for more than 2000 TWH of energy consumption by 2030. India has an expected energy deficit of around 12% which is one of the major hurdles for the government. This will result in a further increase in electrification in all areas. Green buildings utilize fewer resources and are healthier to live in. They offer significant operational cost savings compared with conventional buildings. In effect, green homes can expect a 14 percent savings in operational costs over five years for new green buildings and 13 percent savings in operational costs over five years for green retrofit and renovation projects. Building owners also report that green buildings, whether new or renovated, give a 7 percent increase in asset value over conventional buildings. **Environmental Design** Randall Thomas, 1999-06-17 First published in 1999, Routledge is an imprint of Taylor & Francis, an information company. **A Guide to Energy Management in Buildings** Douglas Harris, 2016-11-29 This new edition of *A Guide to Energy Management in Buildings* begins by asking why we need to control energy use in buildings and proceeds to discuss how the energy consumption of a building can be assessed or estimated through an energy audit. It then details a range of interventions to reduce energy use and outlines methods of assessing the cost effectiveness of such measures. Topics covered include where and how energy is used in buildings, energy audits, measuring and monitoring energy use, techniques for reducing energy use in buildings, legislative issues. And new in this edition: the cooling of buildings, fuel costs and smart metering and education and professional recognition. It provides a template for instigating the energy management process within an organization as well as guidance on management issues such as employee motivation and gives practical details on how to carry the process through. This book should appeal to building and facilities managers and also to students of energy management modules in FE and HE courses. **Intelligent Buildings: An Introduction** Derek Clements-Croome, 2013-10-08 This book introduces the concept of Intelligent Buildings to the wider construction community. Edited by the Father of Intelligent Buildings, Derek Clements-Croome, the book explains that intelligent buildings should be sustainable, healthy, technologically aware, meet the needs of occupants and business and should be flexible and adaptable to deal with change. This means the processes of planning, design, construction, commissioning and facilities management, including post occupancy evaluation, are all important. Buildings comprise many systems devised by many people and yet the relationship between buildings and people can only

work satisfactorily if there is an integrated team with a holistic vision      **Understanding the Building Regulations** Simon Polley, 2014-09-15 Do you need a concise jargon free and compact guide to the UK building regulations Simon Polley boils down the regulations to their basic features explaining the core principles behind them Easy to read and light enough to carry around with you this is the ideal introduction to a vital part of your remit as a building control officer architect or surveyor Updated with the extensive 2013 changes and illustrated with cartoons and diagrams      Building Services Handbook Roger Greeno, Fred Hall, 2009-06-04 The Building Services Handbook summarises concisely in diagrams and brief explanations all elements of building services Practice techniques and procedures are clearly defined with supplementary references to regulations and relevant standards This is an essential text for all construction building services students up to undergraduate level and is also a valuable reference text for building service professionals This new book is based on Fred Hall's Essential Building Services and Equipment 2ed and has been thoroughly updated throughout It is a companion volume to the highly popular
