Colorado Crosshairs Colorado Crosshairs:

In The Cross Hairs Gregory A. Pierson, 2014-08-16 The time is the twenty third century Richard Cox is the commander of the Johnson Point Space Surveillance Installation on Danovia Prime For five years there has been relative calm in this region of interstellar space An uptick in monitored subspace and regular frequency radio traffic discloses disturbing calls for help as entire worlds in an area known as Gulf are being obliterated As Cox Executive Officer Genni Carr and Prime Minister Jon Dewey confer the cause of this destruction has been transported for hiding at the North Pole of their terrestrial moon Trinity by two male Terran ne'er do wells and two female Dakkarosi denizens An ancient modified Expansion War era Terran transport is spotted from orbit by a vessel on routine patrol as it is in the process of unloading a huge block of ancient silver metal The perpetrators are apprehended and interrogated on Danovia It is disclosed that these Dakkarosi denizens ignited the spreading conflict by stealing this object from the unknown and powerful Ypsilanti Empire As the gravity of this situation is debated they listen in stunned disbelief The Terran males have secretly ferried scores of Dakkarosi to Trinity That act alone has now placed Danovia in the cross hairs of the most lethal killing machine in the cosmos The personnel of Johnson Point can only hold their breaths as this situation spawned in the depths of interstellar space spirals out of control in Volume 1 of *In The Crosshairs The Interstellar War Ignites* *The Trailsman* #368 Jon Sharpe, 2012-06-05 There is a bullet with Skye Fargo's name on it Skye Fargo is deep in dangerous Mountain Ute country scouting and guarding for a team of ice miners looking to make a killing in the boiling summer months But there is something deadlier than heatstroke waiting for Fargo His name is Gus Latimer He has got hands of lightning nerves of steel and one thing on his mind Kill the Trailsman *The Human Gait* Wilhelm Braune, Otto Fischer, 2012-12-06 The different chapters of the present book were published separately each as a complete entity in the Proceedings of the Royal Saxon Society for Sciences Chapter 1 appeared in 1895 under the names of Wilhelm Braune and Otto Fischer although Braune died immediately after the initial experiments before the recordings had been interpreted Chapters 2-6 were signed by Fischer only and appeared in 1899 1900 1901 1903 and 1904 Basic data needed for this investigation of the human gait had been provided previously A research on the centre of gravity of the human body and its different segments by both authors was published in 1889 determination of the moments of inertia of the human body and its segments in 1892 So far only the first of these two works has been published in English The other has been translated and awaits publication Springer Verlag must be congratulated for the quality of this edition and for the care they took in reproducing the original figures This was certainly no easy task We thank them for the patience they displayed towards the translators Publication of the present book was made possible financially by Prof M Muller Bern We are grateful to him for his generosity and so will be the scientific community **New Power** Jeremy Heimans, Henry Timms, 2018-04-03 NOW A NATIONAL BESTSELLER The definitive guide to spreading ideas building movements and leaping ahead in our chaotic connected age Get the book New York Times columnist David Brooks calls the best window I've seen into this new

world Why do some leap ahead while others fall behind in our chaotic connected age In New Power Jeremy Heimans and Henry Timms confront the biggest stories of our time the rise of mega platforms like Facebook and Uber the out of nowhere victories of Obama and Trump the unexpected emergence of movements like MeToo and reveal what's really behind them the rise of new power For most of human history the rules of power were clear power was something to be seized and then jealously guarded This old power was out of reach for the vast majority of people But our ubiquitous connectivity makes possible a different kind of power New power is made by many It is open participatory and peer driven It works like a current not a currency and it is most forceful when it surges The battle between old and new power is determining who governs us how we work and even how we think and feel New Power shines fresh light on the cultural phenomena of our day from BlackLivesMatter to the Ice Bucket Challenge to Airbnb uncovering the new power forces that made them huge Drawing on examples from business activism and pop culture as well as the study of organizations like Lego NASA Reddit and TED Heimans and Timms explain how to build new power and channel it successfully They also explore the dark side of these forces the way ISIS has co-opted new power to monstrous ends and the rise of the alt right's intensity machine In an era increasingly shaped by new power this groundbreaking book offers us a new way to understand the world and our role in it

Stewart, 2021-09-15 As threats to the security of information pervade the fabric of everyday life A Vulnerable System describes how even as the demand for information security increases the needs of society are not being met The result is that the confidentiality of our personal data the integrity of our elections and the stability of foreign relations between countries are increasingly at risk Andrew J Stewart convincingly shows that emergency software patches and new security products cannot provide the solution to threats such as computer hacking viruses software vulnerabilities and electronic spying Profound underlying structural problems must first be understood confronted and then addressed A Vulnerable System delivers a long view of the history of information security beginning with the creation of the first digital computers during the Cold War From the key institutions of the so-called military industrial complex in the 1950s to Silicon Valley start-ups in the 2020s the relentless pursuit of new technologies has come at great cost The absence of knowledge regarding the history of information security has caused the lessons of the past to be forsaken for the novelty of the present and has led us to be collectively unable to meet the needs of

the current day From the very beginning of the information age claims of secure systems have been crushed by practical reality The myriad risks to technology Stewart reveals cannot be addressed without first understanding how we arrived at this moment A Vulnerable System is an enlightening and sobering history of a topic that affects crucial aspects of our lives
