Walvoord, Virginia Johnson Anderson, 2011-01-13 The second edition of *Effective Grading* the book that has become a classic in the field provides a proven hands on guide for evaluating student work and offers an in depth examination of the link between teaching and grading Authors Barbara E Walvoord and Virginia Johnson Anderson explain that grades are not isolated artifacts but part of a process that when integrated with course objectives provides rich information about student learning as well as being a tool for learning itself The authors show how the grading process can be used for broader assessment objectives such as curriculum and institutional assessment This thoroughly revised and updated edition includes a wealth of new material including Expanded integration of the use of technology and online teaching A sample syllabus with goals outcomes and criteria for student work New developments in assessment for grant funded projects Additional information on grading group work portfolios and service learning experiences New strategies for aligning tests and assignments with learning goals Current thought on assessment in departments and general education using classroom work

Stiggins, Nancy Faires Conklin, 1992-01-01 This book marks the starting point of a profound shift in assessment priorities detailing the results of a decade long program of research on classroom assessment environments It demonstrates how important sound classroom assessments are to student well being and provides insights into the complex demands of day to day classroom assessment on teachers who have been taught little about assessment in their training programs As a nation we spend billions of dollars on educational assessment including hundreds of millions for international and national assessments and additional hundreds of millions for statewide testing programs On top of these the standardized tests that form the basis of district wide testing programs represent a billion dollar industry If we total all of these expensive highly visible politically important assessments we still account for less than one percent of all the assessments conducted in America s schools The other 99 percent are conducted by teachers in their classrooms on a moment to moment day to day and week to week basis Paradoxically virtually all of our national state and local assessment resources are being devoted to research and development for large scale assessments This book provides specific action programs for improving the quality of the other 99 percent the assessments that really drive what students learn and how they feel about it **Making Standards Useful in the Classroom** Robert J. Marzano, Mark W. Haystead, 2008 It s true that state standards often have way too much content and aren t written in a way that enhances classroom instruction and formative assessment That s why this guide is invaluable for any educator who wants to ensure that standards actually lead to higher student achievement The authors give you good reasons for why some content standards should be dropped and explain how benchmark statements in standards should be rewritten Learn how to sequence content and set up grading scales that help facilitate formative assessment and effective instruction And get clear steps for unpacking and converting standards into guidelines that are much more useful to classroom teachers To implement this book s much more efficient approach the authors included over 240 pages of detailed scoring scales and sample measurement topics for k 8 science math language arts social studies and

critical life skills topics for elementary through high school students

Charting a Course to Standards-Based Grading

Tim Westerberg, 2016-08-24 What is the best way to ensure that grading policies are fair, accurate, and consistent across classrooms? How can schools transition to a grading system that better reflects what students are actually learning? Tim R. Westerberg makes this journey easier by offering a continuum of options with four destinations on the road to improved grading and assessment. Destination 1 critically examines such popular grading mechanisms as the zero extra credit, the semester killer project, averaging, mixing academic performance with work ethic, and refusing to accept late work, and explains how they undermine objectivity and instead result in widely divergent grades for comparable work with major consequences for students. Destination 2 invites educators to put assessment and grading into the larger context of a districtwide, guaranteed, and viable curriculum and lays out the organizational conditions and necessary steps to accomplish this goal. Destination 3 brings parents and others on board with a multiyear implementation plan and community engagement strategies for introducing report cards that indicate student achievement by standards rather than or in addition to letter grades. Destination 4: competency-based education involves a total rethinking of the nature and structure of school leading to individualized education for all students. However far they choose to go, administrators and teacher leaders can turn to *Charting a Course to Standards-Based Grading* for the quick wins and long-term support and guidance they need to make the trip well worth the effort. *Answers to Essential Questions About Standards, Assessments, Grading, and Reporting* Thomas

R. Guskey, Lee Ann Jung, 2013 This is an easy-to-use guide on assessment for learning, answering common questions about 21st-century standards and grading considerations. **The College Classroom Assessment Compendium** Jay
