Classroom Assessment What Teachers Need To Know:

Classroom Assessment W. James Popham, 2018-03-07 Jim Popham's widely popular Classroom Assessment shows teachers how to use classroom testing skillfully and formatively to dramatically increase their teaching effectiveness and make a difference in how well students learn. As in past editions, the author pays particular attention to the instructional payoffs of well designed classroom tests and highlights the implications of testing on teaching throughout. In special But What Does This Have to Do with Teaching sections in each chapter, Decision Time vignettes present practical classroom problems and show readers actual decisions being made. Parent Talk features describe situations in which a teacher needs to explain something about assessment to parents and show what the author would say in that situation. And a lighter tone is established with cartoons to which readers can relate. The new Eighth Edition highlights the increasing importance of educational assessment in an era of common core state standards and teacher evaluations based on students' test scores, incorporates the Standards for Educational and Psychological testing guidelines throughout relevant sections, and includes a new section on instructionally diagnostic tests to help readers evaluate the merits of commercial or locally developed diagnostic assessment. Also available with MyLab Education, MyLab™ is the teaching and learning platform that empowers you to reach every student. By combining trusted author content with digital tools and a flexible platform, MyLab personalizes the learning experience and improves results for each student. MyLab Education helps teacher candidates bridge the gap between theory and practice, better preparing them for success in their future classrooms. **Note:** You are purchasing a standalone product; MyLab Education does not come packaged with this content. James Popham, 2005. I have an extremely high opinion of this textbook. This is the only assessment text I have ever used that students actually read consistently. Students frequently comment about their enjoyment of the text and their appreciation for the humor injected throughout the chapters. Marcy Blackburn, Cameron University. The topics are presented very clearly, are very well organized, and are sufficiently comprehensive for pre-service teachers. Brian C. McKevitt, Iowa State University. Written in Jim Popham's characteristic witty style, the Fourth Edition of Classroom Assessment addresses the range of assessments that teachers are likely to use in their classrooms. The forces of accountability have changed educational assessment, and this new edition now addresses the central issue of how classroom assessment can effectively benefit

students when carried out in the context of accountability tests New legislation such as the No Child Left Behind Act NCLB and issues such as state standards that directly impact classroom testing and teaching are discussed to present readers with a series of practical action options In addition the text continues to analyze more traditional topics such as validity and reliability and discusses the alternative assessments used in today s classrooms MyLabSchool Discover where the classroom comes to life MyLabSchool gives you powerful insights into how real classrooms work From video clips of teachers and students interacting to sample lessons portfolio templates and standards integration we give you the tools you ll need to succeed in the classroom MyLabSchool is only available if your instructor has set up a MyLabSchool course Visit www.mylabschool.com to register all you need are your instructor s course ID and an access code FREE when packaged with a new copy of this book or available for purchase at your bookstore OR a credit card to purchase immediate online access If your instructor is not using MyLabSchool ask him or her to consider MyLabSchool to give you every chance to succeed in your course

Classroom Assessment W. James Popham, 2008 Written with style and humor this text focuses on what classroom teachers really need to know about assessment rather than looking at a collection of measurement esoterica
