Climate Change And Development Routledge Perspectives On Development:

Climate Change and Development Thomas Tanner, Leo Horn-Phathanothai, 2014-01-10 The evidence for human induced climate change is now overwhelming the brunt of its impacts is already being felt by poor people and the case for urgent action is compelling This book addresses the two greatest challenges of our time averting catastrophic climate change and eradicating poverty and the close interconnections between them Climate Change and Development provides a comprehensive and multi disciplinary foundation for understanding the complex and tangled relationship between development and climate change It argues that transformational approaches are required in order to reconcile poverty reduction and climate protection and secure sustained prosperity in the twenty first century Section One provides the building blocks for understanding climate science and the nexus between climate and development Section Two outlines responses to climate change from the perspective of developing countries with chapters on international agreements climate change mitigation and adaptation and climate finance Each chapter offers analytical tools for evaluating responses enabling readers to ask smart questions about the climate change and development nexus as policy and action evolve in the coming years The last three chapters of the book contained in Section Three are forward looking and focus on why and how development must be re framed to deliver more equitable and sustainable outcomes This section sets out different critiques of development as usual and explores alternative paradigms of development in a warming and resource constrained world This is an invaluable and clearly written text that uses real world examples to bring to life perspectives from across different disciplines It also contains chapter learning outcomes and end of chapter summaries discussion questions and suggestions for further reading and relevant websites The text is suitable for both undergraduate and postgraduate students as well as those working in international development contexts who wish to get to grips with this pressing global challenge

Development Theory and Climate Change M. A.M. Salih, 2025-09-10 Development Theory and Climate Change is an illuminating exploration of the decline and subsequent revival of development theories M A Mohamed Salih demonstrates how the end of the Cold War and the ascendancy of neoliberal global capitalism have caused the revival of core conceptual frameworks derived from modernization dependency and the world system theories

Theories and Practices of Development Katie Willis, 2011-02-25 Global economic crisis and the implications of global environmental change have led academics and policy makers to consider how development in all parts of the world should be achieved However development has always been a contested idea While often presented as a positive process to improve people s lives the potential negative dimensions of development on people and environments must also be recognized Theories and Practices of Development provides a clear and user friendly introduction to the complex debates around how development has been understood and achieved The second edition has been fully updated and expanded to reflect global political and economic shifts as well as new approaches to development The rise of China and India is given particular attention as is the global

economic crisis and its implications for development theories and practice There are new sections on faith based development and the development dimensions of climate change as well as greater engagement with development theories as they are put into practice in the Global North The book deals with the evolution of development ideas and policies focusing on economic political social environmental and spatial dimensions It highlights how development cannot be considered as a neutral concept but is entwined with inequalities in power at local as well as national and global scales The use of boxed examples tables and illustrations helps students understand complex theoretical ideas and also demonstrates how development theories are put into practice in the real world Each chapter ends with a summary section discussion topics suggestions for further reading and website resources

Basic Income for Disasters and Climate Change in Africa Sara Bernardo, 2024-11-07 This book considers how basic income could be used as a mechanism for disaster risk reduction and climate change adaptation in African agrarian societies African agrarian societies are among those most severely impacted by disasters due to insufficient financial and technological resources to prepare for and respond to crises This book argues that hazards and environmental disasters are increasingly not isolated occurrences and the vulnerability of communities is cumulative event after event with capacities to cope and adapt weakened progressively With pre and post disaster operating as a single continuous process basic income could provide communities with a stable flow of money leaving them better able to adapt and respond to crises To illustrate the theoretical framework the book uses Mozambique and more specifically the district of B zi as an instrumental case study This innovative book will be of interest to readers across the fields of global development African studies and humanitarian and disaster studies

Proceedings of the 2nd International Conference on Democracy and Social Transformation (ICON-DEMOST 2023) Naili Ni'matul Illiyyun, Endang Supriadi, Ririh Megah Safitri, Masrohatun Masrohatun, 2024-01-05 This is an open access book Faculty of Social and Political Science State Islamic University Walisongo Semarang has been playing significant roles in building global peace and justice by conducting scientific research and creating a space for academic dialogue and discussion This goal is in line with our vision to be a Research Faculty based on the unity of sciences for humanity and civilization As part of the efforts to create a space for academic dialogue at a global level we organize an international conference which aims to develop scientific knowledge build institutional capacity and strengthen international networking The conference is also held to support State Islamic University Walisongo Semarang in achieving its vision to be an Islamic world class university The conference raises the issue of democracy and social transformation to capture the social and political dynamics The selection of this topic is based on the idea that technological development is becoming a crucial issue within modern society in which people tend to experience alienation within the rapid social and political transformation Democracy as a political system that ensures transparency citizen participation and human rights protection is now under threat Having the fact that there is a growing tendency of using transactional politics to win political interests such as the use of money and identity in political processes

therefore political analysts consider this situation as the regression of democracy. Rapid social and cultural transformation as a consequence of advanced technology creates problems in modern society. On one hand, technology has made the life of people easier. However, on the other hand, the sense of humanity's values and principles is declining. This situation can be observed in the decrease in social solidarity and the rise of individualism. Modernity that values productivity and economic growth has brought a negative impact on the life of human being and nature. The exploitative character of industrialization has created an ecological crisis. Advanced information technology has loosened social cohesivity and the rise of instrumental rationality has removed local genius or local wisdom from the life of society. Since the ultimate goal of humanity is respecting the dignity of human beings, hence bringing back humanity to the center of the development program is crucial, especially in the current social and political dynamics. In the political context, humanity means respecting the basic rights of the citizen and putting them as a subject of political development and not perceiving citizens as only an instrument to win political power. Based on the above background, this conference is organized. The overall goal of the conference is to mainstream humanity in the current social and political change. The conference is also expected to be an arena for scholars and experts in social and political science as well as practitioners and policymakers to meet and exchange ideas and perspectives for a better future of our society.

Theories and Practices of Development Katie Willis, 2020-12-17. The newly updated third edition provides a clear and user-friendly introduction to the complex debates around how development has been understood and achieved. It has been fully updated and expanded to reflect global political and economic shifts as well as new approaches to development. The book deals with the evolution of development ideas and policies focusing on economic, political, social, environmental, and spatial dimensions. It highlights how development cannot be considered as a neutral concept but is entwined with inequalities in power at local as well as national and global scales. A new chapter on politics and development presents debates around development and democracy, civil society organizations, and human rights. Sections on diversity and development have been expanded, and the book considers the future of development in the era of the Sustainable Development Goals (SDGs). The use of boxed examples, tables, and illustrations helps students understand complex theoretical ideas and also demonstrates how development theories are put into practice in the real world. Each chapter ends with a summary section, discussion topics, suggestions for further reading, and website resources. This key text provides a clear and thorough explanation of key development theories and practices. The third edition will remain an invaluable resource for undergraduate students in geography, politics, and development studies.

Exploring Sustainable Development Martin Purvis, Alan Grainger, 2013-06-17. Sustainable development is capturing the attention of planners, politicians, and business leaders. Within the academic sphere, its study is increasingly breaching disciplinary boundaries to become a focus of attention for natural and social scientists alike. But in studying such a key concept, it is vital that there is a clear definition of what it means, how it is applied on the ground, and the influence it exerts upon people's perceptions of

change in the physical environment economic activity and society Exploring Sustainable Development is a major new text which provides a multifaceted introduction to key areas of study in this field examining sustainability at the full range of spatial scales from the local to the global Building on existing theory it demonstrates the unique contributions that thinking geographically about space place and human environment relationships can bring to the analysis of sustainable development This book explores different interpretations of sustainable development in both theory and practice in developed and developing countries and in rural and urban areas It pays particular attention to the local national and international politics of implementation the future of climate and energy the role of business and different conceptions of agricultural sustainability This wide ranging text is ideal for undergraduates and postgraduates in geography environmental science development studies and related social and political sciences

Identifying Emerging Issues in Disaster Risk Reduction, Migration, Climate Change and Sustainable Development Karen Sudmeier-Rieux,Manuela

Fernández,Ivanna M. Penna,Michel Jaboyedoff,J.C. Gaillard,2016-08-29 The goal of this book is to explore disaster risk reduction DRR migration climate change adaptation CCA and sustainable development linkages from a number of different geographical social and natural science angles Well known scientists and practitioners present different perspectives regarding these inter linkages from around the world with theoretical discussions as well as field observations This publication contributes in particular to the discussion on the Sendai Framework for Disaster Risk Reduction SFDRR 2015 2030 and the debate about how to improve DRR including CCA policies and practices taking into account migration processes from a large perspective where both natural and social factors are crucial and mutually alloyed Some authors see the SFDRR as a positive step forward in terms of embracing a multitude of issues others doubting that the agreement will lead to much concrete action toward real action on the ground This book is a timely contribution for researchers students and policy makers in the fields of environment human geography migration disaster and climate change studies who seek a more comprehensive grasp of contemporary development issues

Green Development William Mark Adams,2001 This revised and updated new edition retains the clear and powerful argument which characterized the original It gives a valuable analysis of the theory and practice of sustainable development and suggests that at the start of the new millennium we should think radically about the challenge of sustainability Fully revised this latest edition includes further reading chapter outlines chapter summaries and new discussion topics and explores the roots of sustainable development thinking and its evolution in the last three decades of the twentieth century the dominant ideas within mainstream sustainable development the nature and diversity of alternative ideas about sustainability the problems of environmental degradation and the environmental impacts of development strategies for building sustainability in development from above and below Offering a synthesis of theoretical ideas on sustainability based on the industrialized economies of the North and the practical applied ideas in the South which tend to ignore First World theory this important text gives a clear discussion of theory and extensive

practical insights drawn from Africa Latin America and Asia Disaster Risk Irasema Alcántara-Ayala, Christopher Gomez, Ksenia Chmutina, Dewald van Niekerk, Emmanuel Raju, Victor Marchezini, Jake Rom Cadag, JC Gaillard, 2022-10-13 The text offers a comprehensive and unique perspective on disaster risk associated with natural hazards It covers a wide range of topics reflecting the most recent debates but also older and pioneering discussions in the academic field of disaster studies as well as in the policy and practical areas of disaster risk reduction DRR This book will be of particular interest to undergraduate students studying geography and environmental studies science It will also be of relevance to students professionals from a wide range of social and physical science disciplines including public health and public policy sociology anthropology political science and geology
