

A photograph of a protest or rally. In the foreground, a person's hands are visible holding a white rectangular sign. The sign has the text "CHANGE THE POLITICS NOT THE CLIMATE" in black, bold, sans-serif capital letters. The word "CHANGE" is at the top, followed by "THE" in a smaller font, then "POLITICS", "NOT THE", and "CLIMATE" at the bottom. There are some small, colorful stickers on the sign: a red one on the right side of "CHANGE" and some green ones on the left side of "THE". The background is a blurred crowd of people, suggesting a large gathering. To the left, another sign is partially visible with the words "WATER" and "IN" in blue letters. The overall scene is outdoors with natural lighting.

## **Climate Change And Political Strategy:**

*Climate Change and Political Strategy* Hugh Compston, 2013-09-13 Although the science of climate change is well established and there are well known policy instruments that could significantly reduce greenhouse gas GHG emissions without prohibitive economic costs political obstacles to more determined action remain despite heightened concern among mainstream politicians and the public This book analyses the political dynamics of climate policy in affluent democracies from a number of different theoretical angles in order to improve our understanding of which political strategies would be likely to enable national governments to make deep cuts in GHG emissions while avoiding significant political damage The authors argue that different conceptual and logical theories highlight different features of political situations Describing the politics of climate policy in this way will result in different conceptual logical views of this phenomenon And to some extent the inferences drawn from such differing views about the nature of political obstacles to more vigorous action on climate change and the best ways of overcoming them will also be different Singly and together these analyses reveal a more detailed nuanced view of the political options open to activist governments This book was previously published as a special issue of *Environmental Politics*

*Legal and Political Challenges of Governing the Environment and Climate Change* Gary Wickham, Jo-Ann Goodie, 2013-11-26 The environment has not always been protected by law It was not until the middle of the 20th century that the environment came to be understood as an entity in need of special care and the law politics duo firmly fixed its focus on this issue In this book Wickham and Goodie tell the story of how law and politics first came upon the environment as an object in need of special attention They outline the unlikely intersection of aesthetics and science that made the environment into the matter of great concern it is today The book describes the way private common law strategies and public law legislative strategies have approached the task of protecting

the environment and explore the greatest environmental challenge to have so far confronted environmental law and politics the threat of global climate change The book offers descriptions of many of the strategies being deployed to meet this challenge and present some troubling assessments of them The book will be of great interest to students teachers and researchers of environmental law socio legal studies environmental studies and political theory *Hegemony, Discourse, and Political Strategy* Thomas Jacobs, 2022-10-15 Hegemony Discourse and Political Strategy revisits a question that has long fascinated socialists progressives democrats Greens and Marxists how do left wing forces win at politics Thirty five years ago Ernesto Laclau and Chantal Mouffe tackled this puzzle in ground breaking fashion by drawing on a signature blend of linguistics Marxist theory and poststructuralism that came to be known as post Marxist Discourse Theory PDT This book takes up the legacy of Laclau and Mouffe and elaborates PDT into a full fledged theory of political strategy for the first time It argues that post Marxism provides the foundations for a form of discourse analysis that can explain how political strategies play out as well as why they fail or succeed Its empirical potential to illuminate the dynamics of hegemonic struggles is demonstrated through a case study focusing on the contestation and politicization of EU trade policy in the European Parliament

**Climate Clever** Hugh Compston, Ian Bailey, 2013-03-01 Why despite two decades of climate policy have affluent democracies made so little progress in cutting greenhouse gas emissions We know that there are ways of doing this that are both practical and affordable It is politics that is the problem Stringent climate policies may lead companies to redirect investment elsewhere or lead voters to retaliate at the ballot box There are many political obstacles to stronger action What can be done Based on an analysis of the logic of policy making plus observation of recent developments in climate politics this book identifies a broad range of political strategies that are available to governments that wish to take more effective action against climate change while avoiding serious political damage Separate chapters deal with strategies relating to unilateral action persuasion political exchange and changing the terms of political exchange This is the first book length study of political strategy and climate change and will be of interest not only to policymakers but also to experts and activists looking to formulate politically realistic policy proposals and scholars and students of politics and environmental studies

**Multinationals' Political Strategies on Climate Change** Ans Kolk, Jonatan Pinkse, 2007 This paper explores the international dimensions of multinationals corporate political activities focusing on an international issue climate change that is being implemented differently in a range of countries Analyzing data from FT Global 500 firms it examines the influence on types and process of multinationals political strategies reckoning with institutional contexts and issue saliency Findings show that the type of political activities can be characterized as an information strategy to influence policymakers towards market based solutions not so much withholding action on emission reduction Moreover multinationals pursue self regulation targeting a broad range of political actors The process of political strategy is mostly one of collective action International differences particularly surface in the type of political actors aimed at with US and Australian firms focusing

more on non government actors voluntary programs than European and Japanese firms Influencing home country not host country governments is the main component of international political strategy on climate change      **Kick-Starting Government Action against Climate Change** Ian Budge,2021-11-11 With drastic action needing to be taken now rather than over the 30 years to 2050 this book addresses the crucial question of how to get action from governments who will always put short term considerations e g post Covid economic growth over longer term climate priorities unless forced to do otherwise How might governments be persuaded to implement policies that will result in effective action And how can this be achieved at an international as well as national level These are the questions that this book focuses on Taking a systematic political science point of view and drawing on collective choice and other theories of political action this book analyses the key political and economic dynamics shaping climate policies around the world identifying major political opportunities that can be exploited by well informed and determined political actors such as NGOs and social movements This book describes how to advance and accelerate climate action around the world and will be of interest internationally to climate change campaigners activists political and environmental scientists      **Domestic Political Change and Grand Strategy** National Bureau of Asian Research (U.S.),2007 Based upon work supported by the Department of Energy National Nuclear Security Administration under Award Number DE FG52 03SF22724      **Political Interference with Climate Change Science Under the Bush Administration** United States.
